**Volume 10059**

Proceedings of SPIE, 1605-7422, V. 10059

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Tomography and Spectroscopy of Tissue XII*, edited by Bruce J. Tromberg, Arjun G. Yodh, Eva Marie Sevick-Muraca, Robert R. Alfano, Proceedings of SPIE Vol. 10059 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

---

**SESSION 1    ADVANCES IN INSTRUMENTATION AND TECHNOLOGY I: FLOW**

---

- 10059 04    **Diffuse speckle contrast analysis with novel fiber-lens detection** [10059-3]
- 10059 05    **Clinical applications of high-speed blood flow measurements with diffuse correlation spectroscopy** [10059-4]

---

**SESSION 2    ADVANCES IN INSTRUMENTATION AND TECHNOLOGY II: SFDI**

---

- 10059 0B    **Enhanced scatter contrast color imaging of tissue: methods for comparing high spatial frequency domain and cross-polarization scatter images** [10059-10]

---

**SESSION 3    ADVANCES IN INSTRUMENTATION AND TECHNOLOGY III: FLUORESCENCE AND MICROSCOPY**

---

- 10059 0E    **Monitoring temporal microstructural variations of skeletal muscle tissues by multispectral Mueller matrix polarimetry** [10059-13]

---

**SESSION 4    ADVANCES IN INSTRUMENTATION AND TECHNOLOGY IV: DOT/DOS/REFL/SCAT**

---

- 10059 0F    **Preliminary results of miniaturized and robust ultrasound guided diffuse optical tomography system for breast cancer detection** [10059-14]

---

**SESSION 5    BREAST IMAGING I**

---

- 10059 0L    **Individual response to neoadjuvant chemotherapy assessed with optical mammography in patients with breast cancer (Invited Paper)** [10059-20]
- 10059 0M    **Development of time-resolved reflectance diffuse optical tomography for breast cancer monitoring** [10059-21]
- 10059 0O    **Breast cancer detection using  $K_{trans}$  MRI imaging to guide near infrared spectroscopy tomography** [10059-23]
- 10059 0P    **The complex evaluation of tumor oxygen state and vasculature during preoperative chemotherapy in patients with breast cancer** [10059-24]

10059 0Q **Baseline oxygen saturation comparison between pathologic complete responders and extensive residual cancer cases in response to neoadjuvant chemotherapy** [10059-25]

---

**SESSION 6 BREAST IMAGING II**

---

10059 0R **A portable 12-wavelength parallel near-infrared spectral tomography (NIRST) system for efficient characterization of breast cancer during neoadjuvant chemotherapy** [10059-26]

10059 0T **Spatial frequency domain imaging for monitoring palpable breast lesions** [10059-28]

---

**SESSION 7 THEORY, ALGORITHMS, AND MODELING I**

---

10059 0X **Statistics of photon penetration depth in diffusive media** [10059-31]

10059 0Z **Real-time spatial frequency domain imaging by single snapshot multiple frequency demodulation technique** [10059-33]

---

**SESSION 8 THEORY, ALGORITHMS, AND MODELING II**

---

10059 10 **A novel approach for the time-domain fluorescence imaging of a semi-infinite turbid medium: Monte Carlo evaluation** [10059-34]

10059 11 **A three-step reconstruction method for fluorescence molecular tomography based on compressive sensing** [10059-35]

10059 12 **Gaussian kernel based anatomically aided diffuse optical tomography reconstruction** [10059-36]

10059 14 **A semi-learning algorithm for noise rejection: an fNIRS study on ADHD children** [10059-38]

---

**SESSION 9 CLINICAL APPLICATIONS**

---

10059 1B **Sentinel lymph node detection in gynecologic malignancies by a handheld fluorescence camera** [10059-45]

---

**SESSION 10 BRAIN, NEURO, AND FUNCTIONAL IMAGING I**

---

10059 1F **Coherent hemodynamics spectroscopy: initial applications in the neurocritical care unit** [10059-49]

10059 1G **Induced and spontaneous hemodynamic oscillations in cerebral and extracerebral tissue for coherent hemodynamics spectroscopy** [10059-50]

---

**SESSION 11 BRAIN, NEURO, AND FUNCTIONAL IMAGING II**

---

- 10059 1I **A fast atlas-guided high density diffuse optical tomography system for brain imaging**  
[10059-52]

---

**SESSION 12 BRAIN, NEURO, AND FUNCTIONAL IMAGING III**

---

- 10059 1P **Correlation between cerebral hemodynamic and perfusion pressure changes in non-human primates** [10059-59]

---

**POSTER SESSION**

---

- 10059 1T **Single snapshot determination of absorption coefficient by multi-frequency MTF characterization in spatial frequency domain** [10059-63]
- 10059 1V **UV fluorescence excitation spectroscopy as a non-invasive predictor of epidermal proliferation and clinical performance of cosmetic formulations** [10059-65]
- 10059 1Y **Wide-field fluorescence diffuse optical tomography with epi-illumination of sinusoidal pattern** [10059-68]
- 10059 1Z **Blood flow measurement of human skeletal muscle during various exercise intensities using diffuse correlation spectroscopy (DCS)** [10059-69]
- 10059 20 **An endoscopic diffuse optical tomographic method with high resolution based on the improved FOUSS method** [10059-71]
- 10059 21 **Assessment of using ultrasound images as prior for diffuse optical tomography regularization matrix** [10059-72]
- 10059 22 **Miniaturized spectrometers using integrated optics** [10059-73]
- 10059 23 **Observation of chest tumor using diffuse optical spectroscopy: time-varying indocyanine green concentration in rabbit model** [10059-74]
- 10059 25 **Design and fabrication of a multi-layered solid phantom: validation platform on methods for reducing scalp-hemodynamic effect from fNIRS signal** [10059-76]
- 10059 26 **Identification and quantitative evaluation of the fiber structure in the pathological tissue using Mueller matrix microscope** [10059-77]
