**Volume 10081**

Proceedings of SPIE, 1605-7422, V. 10081

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Frontiers in Biological Detection: From Nanosensors to Systems IX*, edited by Amos Danielli, Benjamin L. Miller, Sharon M. Weiss, Proceedings of SPIE Vol. 10081 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## PLASMONICS AND SERS

---

10081 02	<b>Re-thinking surface enhance Raman spectroscopy (SERS) sensors with a systems perspective (Invited Paper)</b> [10081-1]
10081 03	<b>Au particle formation on the electron beam induced membrane</b> [10081-2]
10081 04	<b>Therapeutic drug monitoring of flucytosine in serum using a SERS-active membrane system</b> [10081-3]
10081 06	<b>Surface enhanced Raman scattering in whispering gallery mode microresonators</b> [10081-5]

---

## INTEGRATED PHOTONICS AND RESONATORS I

---

10081 0D	<b>Resonant photonic structures in porous silicon for biosensing</b> [10081-12]
----------	---

---

## INTEGRATED PHOTONICS AND RESONATORS II

---

10081 0F	<b>On-chip infrared sensors: redefining the benefits of scaling (Invited Paper)</b> [10081-14]
10081 0G	<b>Enhanced surface sensitivity in microring resonator biosensor based on subwavelength grating waveguides</b> [10081-15]

---

## LUMINESCENCE

---

10081 0K	<b>X-ray excited luminescent chemical imaging (XELCI) for non-invasive imaging of implant infections (Invited Paper)</b> [10081-19]
----------	---

---

## NEW REAGENTS, TECHNIQUES, AND DIAGNOSTICS

---

10081 0O	<b>Peptide-based antibody alternatives for biological sensing in austere environments (Invited Paper)</b> [10081-23]
----------	--

- 10081 OR **Light assisted drying (LAD) for protein stabilization: optimization of laser processing parameters** [10081-26]
- 10081 OS **High-throughput screening based on label-free detection of small molecule microarray** [10081-27]
