**Volume 10089**

Proceedings of SPIE 0277-786X, V. 10089

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Measurements, Rogue Phenomena, and Single-Shot Applications II*, edited by Bahram Jalali, Daniel R. Solli, Sergei K. Turitsyn, Günter Steinmeyer, Neil G. R. Broderick, Proceedings of SPIE Vol. 10089 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510606197

ISBN: 9781510606203 (electronics)

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Authors*  
vii *Conference Committee*

---

## **SESSION 1 LASER TRANSIENTS AND ELECTRON BEAM DYNAMICS**

---

- 10089 02 **Unveiling relativistic electron bunch microstructures and their dynamical evolutions, using photonic time-stretch (Invited Paper)** [10089-7]
- 10089 03 **Single-shot observation of optical rogue waves in integrable turbulence using time microscopy (Invited Paper)** [10089-2]
- 10089 05 **Single-shot spectroscopy of broadband Yb fiber laser (Invited Paper)** [10089-4]
- 10089 07 **Hidden amplitude-phase correlations in the carrier-envelope noise of mode-locked lasers (Invited Paper)** [10089-6]

---

## **SESSION 2 REAL-TIME TECHNIQUES**

---

- 10089 09 **Optical pulse waveform profiling through real-time stamping to corresponding characteristic spectra (Invited Paper)** [10089-8]
- 10089 0A **Billion frames per second spectrum measurement for high-repetition-rate optical pulses based on time stretching technique (Invited Paper)** [10089-9]
- 10089 0B **Real-time spatiotemporal measurement of ultrafast fields from multimode optical fibers (Invited Paper)** [10089-10]

---

## **SESSION 3 PHOTON DOPPLER VELOCIMETRY AND RANGING**

---

- 10089 0F **Broadband laser ranging development at the DOE Labs (Invited Paper)** [10089-14]
- 10089 0G **Broadband laser ranging: signal analysis and interpretation (Invited Paper)** [10089-15]
- 10089 0H **Velocity measurement using frequency domain interferometer and chirped pulse laser (Invited Paper)** [10089-16]

---

## **SESSION 4 NONLINEAR DYNAMICS AND MEASUREMENTS I**

---

- 10089 0I **Spatiotemporal coupling effects in ultrashort pulses and their visualization** [10089-17]

**SESSION 5    NONLINEAR DYNAMICS AND MEASUREMENTS II**

---

10089 0O    **Suppression of noise of soliton pulses using a polarization-imbalanced nonlinear loop mirror** [10089-23]

10089 0P    **Single shot diagnostic for ultrashort pulses from optical parametric oscillators** [10089-25]

**POSTER SESSION**

---

10089 0R    **Analysis and enhancement of 3D shape accuracy in a single-shot LIDAR sensor** [10089-24]

10089 0S    **Towards autonomous photonic reservoir computer based on frequency parallelism of neurons** [10089-27]
