SPIE

Volume 10188

Proceedings of SPIE 0277-786X, V. 10188

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Radar Sensor Technology XXI*, edited by Kenneth I. Ranney, Armin Doerry, Proceedings of SPIE Vol. 10188 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510608771

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

APPLICATIONS AND EXPLOITATION I

10188 02	Passive coherent location direct signal suppression using hardware mixing techniques [10188-1]
10188 03	Multistatic passive coherent location resource optimization [10188-2]
10188 04	Continuous high PRF waveforms for challenging environments [10188-3]
10188 05	Automatic change detection using very high-resolution SAR images and prior knowledge about the scene [10188-4]
10188 06	On results using automated wideband instrumentation for radar measurements and characterization [10188-5]
10188 07	Mapping detailed 3D information onto high resolution SAR signatures [10188-6]

INDOOR AND URBAN IMAGING

10188 08	A low-cost through-wall FMCW radar for stand-off operation and activity detection [10188-7]
10188 09	A coherent through-the-wall MIMO phased array imaging radar based on time-duplexed switching [10188-8]
10188 0A	Theoretical considerations for a dynamic calibration target for through-wall and through-rubble motion-sensing Doppler radar [10188-9]
10188 0B	Detection and tracking of human targets in indoor and urban environments using through-the-wall radar sensors [10188-10]

QUANTUM RADAR

10188 0C	Electric and magnetic target polarization in quantum radar [10188-11]
10188 0D	The Lemur Conjecture [10188-12]
10188 0E	Quantum geodesy [10188-13]

- 10188 0F Quantum synthetic aperture radar [10188-14]
- 10188 0G Quantum imaging for underwater arctic navigation [10188-15]
- 10188 0H Passive ghost imaging using caustics modeling [10188-16]
- 10188 0I Enhanced sensing and communication via quantum networks [10188-17]

APPLICATIONS AND EXPLOITATION II

- 10188 0J Signal processing techniques for the U.S. Army Research Laboratory stepped frequency ultra-wideband radar [10188-18]
- 10188 0K RFID antenna design for circular polarization in UHF band [10188-20]
- 10188 0L VideoSAR collections to image underground chemical explosion surface phenomena [10188-21]
- 10188 0M Noise and LPI radar as part of counter-drone mitigation system measures [10188-22]
- 10188 0N Determining the coherence matrix for single look polarimetric SAR data [10188-23]

COMPONENTS AND TECHNOLOGY

- 10188 0O Does the central limit theorem always apply to phase noise? Some implications for radar problems [10188-24]
- 10188 0P Reconfigurable signal processor designs for advanced digital array radar systems [10188-25]
- 10188 0Q Linear chirp phase perturbing approach for finding binary phased codes [10188-26]

MICRODOPPLER

- 10188 0R The operator approach to the non-uniform Doppler to radar: implications for signal processing [10188-27]
- 10188 0S Advanced Doppler radar physiological sensing technique for drone detection [10188-28]
- 10188 0T Millimeter-wave micro-Doppler measurements of small UAVs [10188-29]
- 10188 0U Micro-Doppler extraction of a small UAV in a non-line-of-sight urban scenario [10188-30]
- 10188 0V Classification of micro-Doppler signatures of human aquatic activity through simulation and measurement using transferred learning [10188-31]

PROGRAMS AND SYSTEMS I

- 10188 0W Fly Eye radar: detection through high scattered media [10188-32]
- 10188 0X A solid state 94-GHz FMCW Doppler radar demonstrator for cloud profiling [10188-33]
- 10188 0Y IoSiS: a radar system for imaging of satellites in space [10188-34]
- 10188 0Z A prototype fully polarimetric 160-GHz bistatic ISAR compact radar range [10188-35]

PROGRAMS AND SYSTEMS II

- 10188 10 Handheld microwave bomb-detecting imaging system [10188-37]
- 10188 12 System upgrades and performance evaluation of the spectrally agile frequency-incrementing reconfigurable (SAFIRE) radar system [10188-39]

PROFILES IN RADAR EDUCATION

- 10188 16 Radar research at The Pennsylvania State University Radar and Communications Laboratory (Invited Paper) [10188-43]
- 10188 17 Radar research at the University of Kansas (Invited Paper) [10188-44]

NONLINEAR AND COGNITIVE RADAR

- 10188 18 Cognitive software defined radar: waveform design for clutter and interference suppression [10188-45]
- 10188 19 Comparison of RF spectrum prediction methods for dynamic spectrum access [10188-46]
- 10188 1A Linearizing an intermodulation radar transmitter by filtering switched tones [10188-47]

POSTER SESSION

- 10188 1C An architecture for pre-warping general parametric frequency-modulated radar waveforms [10188-49]
- 10188 1D Using coherence as a quality measure for complex radar image compression [10188-50]
- 10188 1E Discriminating spurious signals in radar data using multiple channels [10188-51]
- 10188 1F Use of unmanned SAR and EO/IR sensor suites for monitoring wildfires [10188-52]
- 10188 1G Classification of radar jammer FM signals using a neural network [10188-53]

- 10188 1H Optimization of neural network architecture for classification of radar jamming FM signals [10188-54]
- 10188 1I Using TerraSAR-X satellite data to detect road age and degradation [10188-55]
- 10188 1J Initial processing and analysis of forward- and side-looking data from the spectrally agile frequency-incrementing reconfigurable (SAFIRE) radar [10188-56]
- 10188 1K A quantum inspired model of radar range and range-rate measurements with applications to weak value measurements [10188-57]
- 10188 1L Design and analysis of a multi-passband complex filter for the multiband cognitive radar system [10188-58]
- 10188 1M Radar detection of buried targets in coastal environments [10188-59]
- 10188 1N Low-elevation tracking technique for X-band unmanned aerial vehicle automatic take-off and landing system [10188-60]
- 10188 1O Bearing angle estimation based on synthetic aperture radar (SAR) image [10188-61]
