SPIE

Volume 10189

Proceedings of SPIE 0277-786X, V. 10189

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Passive and Active Millimeter-Wave Imaging XX*, edited by David A. Wikner, Duncan A. Robertson, Proceedings of SPIE Vol. 10189 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 HISTORY AND IMAGER EVALUATION

- 10189 02 **Millimeter wave imaging: a historical review (Invited Paper)** [10189-1]
10189 03 **Expanding the spectrum: 20 years of advances in MMW imagery (Invited Paper)** [10189-2]
10189 04 **Developments in the use and capability of millimetre wave technologies for stand-off detection of threat items over the last decade** [10189-3]
10189 05 **Developing an ANSI standard for image quality tools for the testing of active millimeter wave imaging systems** [10189-4]
10189 06 **Identifying explosives using broadband millimeter-wave imaging** [10189-5]

SESSION 2 PHENOMENOLOGY

- 10189 07 **Improved characterization of scenes with a combination of MMW radar and radiometer information** [10189-7]
10189 08 **Measurements of the dielectric properties of explosives and inert materials at millimeter wave frequencies (V-band and above) using free space reflection methods** [10189-8]

SESSION 3 IMAGING SYSTEMS

- 10189 0A **Design and performance of a THz block camera with a 130nm CMOS focal plane array** [10189-11]
10189 0B **Security screening via computational imaging using frequency-diverse metasurface apertures** [10189-12]
10189 0C **High resolution, wide field of view, real time 340GHz 3D imaging radar for security screening** [10189-13]

SESSION 4 ENABLING TECHNOLOGY

- 10189 0E **Quad-channel beam switching WR3-band transmitter MMIC** [10189-15]
10189 0F **Optical-fiber-connected 300-GHz FM-CW radar system** [10189-16]

- 10189 0G **Reconfigurable metasurface aperture for security screening and microwave imaging**
[10189-17]
- 10189 0H **Alternative synthetic aperture radar (SAR) modalities using a 1D dynamic metasurface antenna** [10189-18]
- 10189 0I **Coded aperture subreflector array for high-resolution radar imaging** [10189-19]
