**Volume 10196**

Proceedings of SPIE 0277-786X, V. 10196

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensors and Systems for Space Applications X*, edited by Khanh D. Pham, Genshe Chen, Proceedings of SPIE Vol. 10196 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510608931

ISBN: 9781510608948 (electronic)

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

---

<b>SESSION 1</b>	<b>ADVANCED CHARACTERIZATION OF SPACE ENVIRONMENTAL VARIABLES FOR SPACE SITUATIONAL AWARENESS</b>
------------------	---

---

10196 02	<b>Detecting faint nearby companions to geostationary satellites with optical interferometry (Invited Paper) [10196-1]</b>
10196 03	<b>Irradiation effect on back-gate graphene field-effect transistor [10196-2]</b>
10196 04	<b>The analysis of the defects of the view field of the UV image intensifier [10196-3]</b>
10196 05	<b>Research on the new type of multi-functional satellite system for space debris detection [10196-4]</b>
10196 06	<b>On-orbit degradation of recent space-based solar instruments and understanding of the degradation processes [10196-5]</b>
10196 07	<b>Big data for space situation awareness [10196-6]</b>

---

<b>SESSION 2</b>	<b>ACQUISITION WARGAMING FOR FUTURE SPACE SYSTEMS</b>
------------------	---

---

10196 08	<b>Owning the program technical baseline for future space systems acquisition: program technical baseline tracking tool (Invited Paper)[10196-7]</b>
10196 09	<b>War-gaming application for future space systems acquisition: MATLAB implementation of war-gaming acquisition models and simulation results (Invited Paper) [10196-8]</b>
10196 0A	<b>War-gaming application for future space systems acquisition part 1: program and technical baseline war-gaming modeling and simulation approaches (Invited paper) [10196-9]</b>
10196 0B	<b>War-gaming application for future space systems acquisition part 2: acquisition and bidding war-gaming modeling and simulation approaches for FFP and FPIF (Invited Paper) [10196-10]</b>

<b>SESSION 3 DATA ANALYTICS AND DECISION SUPPORT FOR SPACE C2 AND SATELLITE OPERATIONS</b>	
10196 0C	<b>Cooperative angle-only orbit initialization via fusion of admissible areas [10196-11]</b>
10196 0D	<b>An orbital emulator for pursuit-evasion game theoretic sensor management [10196-12]</b>
10196 0E	<b>Joint sparsity based heterogeneous data-level fusion for target detection and estimation [10196-13]</b>
10196 0F	<b>An adaptive software defined radio design based on a standard space telecommunication radio system API [10196-14]</b>
10196 0G	<b>Machine learning based Intelligent cognitive network using fog computing [10196-15]</b>
<b>SESSION 4 ADDITIVE MANUFACTURING FOR SPACE ACCESS</b>	
10196 0H	<b>An update on the OpenOrbiter I Mission and its paradigm's benefits for the defense, homeland security and intelligence communities [10196-16]</b>
10196 0I	<b>Consideration of materials for creating 3D printed space sensors and systems [10196-17]</b>
<b>SESSION 5 SMALL SATELLITE DESIGN AND DEVELOPMENT</b>	
10196 0J	<b>Electrical design for origami solar panels and a small spacecraft test mission [10196-19]</b>
10196 0K	<b>Low-cost satellite mechanical design and construction [10196-20]</b>
10196 0M	<b>CubeSat mechanical design: creating low mass and durable structures [10196-22]</b>
