

PROCEEDINGS OF SPIE

Mobile Multimedia/Image Processing, Security, and Applications 2017

Sos S. Aghaian
Sabah A. Jassim
Stephen P. DeMarco
Vijayan K. Asari
Editors

10–11 April 2017
Anaheim, California, United States

Sponsored and Published by
SPIE

Volume 10221

Proceedings of SPIE 0277-786X, V. 10221

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Mobile Multimedia/Image Processing, Security, and Applications 2017*, edited by Sos S. Aghaian, Sabah A. Jassim, Stephen P. DelMarco, Vijayan K. Asari, Proceedings of SPIE Vol. 10221 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SESSION 1 AUDIO-VISUAL HUMAN IDENTIFICATION

10221 02	State-space based modeling for imaging system identification [10221-1]
10221 05	Fast and accurate face recognition based on image compression [10221-4]
10221 06	Autonomous facial recognition system inspired by human visual system based logarithmical image visualization technique [10221-5]
10221 07	Pattern recognition algorithm using descriptors combined radio and visible spectra [10221-6]

SESSION 2 IMAGE SEGMENTATION IN APPLICATIONS

10221 08	Automatic pelvis segmentation from x-ray images of a mouse model [10221-8]
10221 09	Computer aided solution for segmenting the neuron line in hippocampal microscope images [10221-9]
10221 0A	Medical image segmentation using 3D MRI data [10221-10]
10221 0B	Using trainable segmentation and watershed transform for identifying unilocular and multilocular cysts from ultrasound images of ovarian tumour [10221-11]

SESSION 3 EVENT AND VISUAL OBJECTS DETECTION

10221 0C	Detection of chaotic dynamics in human gait signals from mobile devices (Invited Paper) [10221-12]
10221 0D	3D indoor scene reconstruction and change detection for robotic sensing and navigation [10221-13]
10221 0E	Visible spectrum-based non-contact HRV and dPPT for stress detection (Invited Paper) [10221-14]
10221 0F	An automated technique for potential differentiation of ovarian mature teratomas from other benign tumours using neural networks classification of 2D ultrasound static images: a pilot study [10221-15]

SESSION 4 PRIVACY AND SECURITY OF MULTIMEDIA OBJECTS

- 10221 OI **Topological image texture analysis for quality assessment (Invited Paper)** [10221-18]
10221 OJ **Key exchange using biometric identity based encryption for sharing encrypted data in cloud environment** [10221-19]

POSTER SESSION

- 10221 OL **Forensic print extraction using 3D technology and its processing** [10221-7]
10221 OM **Comparative study of palm print authentication system using geometric features** [10221-21]
10221 ON **A novel method for rotation invariant palm print image stitching** [10221-22]
10221 OO **Method for stitching microbial images using a neural network** [10221-23]
10221 OQ **A human visual based binarization technique for histological images** [10221-25]
10221 OS **Application of local binary pattern and human visual Fibonacci texture features for classification different medical images** [10221-27]
