Volume 10401

Proceedings of SPIE 0277-786X, V. 10401

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Astronomical Optics: Design, Manufacture, and Test of Space and Ground Systems*, edited by Tony B. Hull, Dae Wook Kim, Pascal Hallibert, Gary B. Hughes, Ronald G. Pirich, Proceedings of SPIE Vol. 10401 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 LASER APPLICATIONS FOR PLANETARY DEFENSE AND EXPLORATION

- 10401 04 **Long-period comet impact risk mitigation with Earth-based laser arrays** [10401-3]
10401 07 **Near field optical model for directed energy propelled spacecraft** [10401-6]

SESSION 2 OPTICAL SYSTEMS FOR DEEP SPACE MISSIONS

- 10401 0A **Ions irradiation on bi-layer coatings** [10401-10]
10401 0B **Systematic investigation of the optical coatings damages induced in harsh space environment (Invited Paper)** [10401-11]
10401 0C **The trillion planet survey: an optical search for directed intelligence in M31** [10401-61]

SESSION 3 TIMING, PHASE, AND THERMAL CONTRIBUTIONS TO SYSTEM DESIGN

- 10401 0D **Restoration of image distorted by atmospheric turbulence achieved by optical phase conjugation (Invited Paper)** [10401-12]
10401 0F **Anti-resonant hollow core fiber for precision timing applications (Invited Paper)** [10401-14]
10401 0G **Thermal assessment of sunlight impinging on OSIRIS-REx OCAMS PolyCam, OTES, and IMU-sunshade MLI blankets in flight (Invited Paper)** [10401-15]

SESSION 4 GLASS AND MATERIALS

- 10401 0I **SCHOTT optical glass in space** [10401-16]
10401 0J **Homogeneity of the coefficient of linear thermal expansion of ZERODUR: a review of a decade of evaluations** [10401-17]
10401 0K **ZERODUR 4m blank surviving up to 20g acceleration** [10401-18]
10401 0M **Review of space radiation interaction with ZERODUR** [10401-20]

SESSION 5 MIRROR/LENS DESIGN AND MODELING

- 10401 ON **Design and component test results of the LSST Camera L1-L2 lens assembly** [10401-21]
- 10401 OO **Advanced Mirror Technology Development (AMTD): year five status** [10401-22]
- 10401 OR **ZERODUR expanding capabilities and capacity for future space-borne and ground-based telescopes** [10401-25]

SESSION 6 OPTICAL TESTING AND ALIGNMENT

- 10401 OS **Instantaneous phase mapping deflectometry for dynamic deformable mirror characterization** [10401-26]
- 10401 OT **JWST center of curvature test method and results** [10401-27]
- 10401 OU **Slanted edge MTF testing for establishing focus alignment at infinite conjugate of space optical systems with gravity sag effects** [10401-28]

SESSION 7 IMAGING AND SENSING I

- 10401 OW **Operation and performance of the New Horizons long-range reconnaissance imager during the Pluto encounter** [10401-30]
- 10401 OY **Adaptation of Dunn Solar Telescope for Jovian Doppler spectro imaging** [10401-32]
- 10401 OZ **An acquisition technology of optical ground station in satellite-ground QKD** [10401-33]
- 10401 11 **Multiplexing in astrophysics with a UV multi-object spectrometer on CETUS, a probe-class mission study** [10401-60]

SESSION 8 IMAGING AND SENSING II

- 10401 12 **Simulating SOFIA's image jitter performance and how the results compare to in-flight measurements** [10401-35]
- 10401 13 **Second-order spherical optoelectronic detector for 3D multi-particles wave emission and propagation in space time domains** [10401-36]
- 10401 14 **4MOST optical system: presentation and design details** [10401-37]
- 10401 15 **Voltage linear transformation circuit design** [10401-38]
- 10401 16 **Design of the telescope controller rejecting ground-based disturbance based on data fusion** [10401-45]

SESSION 9 FILTER AND MIRROR TECHNOLOGY

- 10401 18 **Active optics as enabling technology for future large missions: current developments for astronomy and Earth observation at ESA** [10401-39]
- 10401 19 **Atomic layer deposition and etching methods for far ultraviolet aluminum mirrors** [10401-40]
- 10401 1A **A dense grid of narrow bandpass filters for the JST/T250 telescope: summary of results** [10401-41]
- 10401 1B **The study of optimization on process parameters of high-accuracy computerized numerical control polishing** [10401-42]
- 10401 1C **Lithographic manufacturing of adaptive optics components** [10401-56]

POSTER SESSION

- 10401 1D **Customized broadband Sloan-filters for the JST/T250 and JAST/T80 telescopes: summary of results** [10401-43]
- 10401 1E **An empirical comparison of primary baffle and vanes for optical astronomical telescope** [10401-44]
- 10401 1F **A friction compensating method based on data fusion in telescope controller design** [10401-46]
- 10401 1H **Optical design of infrared pyramid wavefront sensor for the MMT** [10401-48]
- 10401 1J **Optical design of the long slit spectrograph for 1m telescope** [10401-51]
- 10401 1K **Control code for laboratory adaptive optics teaching system** [10401-52]
- 10401 1P **Optical design for CETUS: a wide-field 1.5m aperture UV payload being studied for a NASA probe class mission study** [10401-59]
