

PROCEEDINGS OF SPIE

Optics in Atmospheric Propagation and Adaptive Systems XX

Karin U. Stein
Szymon Gladysz
Editors

13–14 September 2017
Warsaw, Poland

Sponsored by
SPIE

Cooperating Organisations

Innovation Centre for Sensor and Imaging Systems (United Kingdom)
ADS Scotland (United Kingdom)
The Knowledge Transfer Network (United Kingdom)
Visit Scotland (United Kingdom)
European Regional Development Fund (Belgium)
Technology Scotland (United Kingdom)
European Association of Remote Sensing Companies (Belgium)
European Association of Remote Sensing Laboratories (Germany)
The British Association of Remote Sensing Companies (United Kingdom)
Remote Sensing & Photogrammetry Society (United Kingdom)

Volume 10425

Proceedings of SPIE 0277-786X, V. 10425

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics in Atmospheric Propagation and Adaptive Systems XX*, edited by Karin U. Stein, Szymon Gladysz, Proceedings of SPIE Vol. 10425 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SESSION 1 CHARACTERIZATION OF THE ENVIRONMENT I

10425 02	Comparison of integrated optical turbulence over the sea in different coastal regions in the world [10425-1]
10425 03	Temporally resolved refractive index structure parameter measurement [10425-5]
10425 04	Meteorological measurements to characterize atmospheric turbulence variation [10425-3]
10425 05	Characterizing the discoloration of EBT3 films in solar UV A+B measurement using red LED [10425-8]

SESSION 2 CHARACTERIZATION OF THE ENVIRONMENT II

10425 06	Electro-optical propagation measurements during the MINOTAUROS experiment in the Cretan Sea [10425-2]
10425 07	Characterization of underwater optical turbulence on the example of the Rayleigh-Benard water tank [10425-6]
10425 09	Inhomogeneity of optical turbulence over False Bay (South Africa) [10425-4]
10425 0A	Seasonal ionospheric scintillation analysis during increasing solar activity at mid-latitude [10425-9]

SESSION 3 FROM HERE TO THE STARS

10425 0B	Preliminary results from the Stereo-SCIDAR at the VLT Observatory: extraction of reference atmospheric turbulence profiles for E-ELT adaptive optics instrument performance simulations (Invited Paper) [10425-10]
10425 0D	The turbulence study in the astronomical observatory in the North Caucasus [10425-12]

SESSION 4 ENVIRONMENTAL PARAMETERS

10425 0E	Nightglow studies at Onera for night-vision applications (Invited Paper) [10425-13]
10425 0F	Shortwave infrared for night vision applications at Fraunhofer IOSB [10425-14]

- 10425 0G **Experimental study on spectral absorbance in fog as a function of temperature, liquid water content, and particle size** [10425-15]
- 10425 0H **Aerosol optical properties inferred from in-situ and path-averaged measurements** [10425-16]
- 10425 0I **The upper atmosphere layer height changes as a precursor of the Padang earthquake on 30 September 2009** [10425-17]

SESSION 5 ADAPTIVE OPTICS SYSTEMS

- 10425 0J **Dynamic adaptive control algorithm based on the realization of Kalman filter** [10425-18]
- 10425 0K **Holographic wavefront sensor, based on diffuse Fourier holography** [10425-19]

SESSION 6 BEAM PROPAGATION THROUGH TURBULENCE

- 10425 0L **Measurement of the spatial distribution of atmospheric turbulence with SCINDAR on a mosaic of urban surfaces (Best Student Paper)** [10425-21]
- 10425 0M **Experimental studies of the correlation of wave-front aberrations of coherent radiation source and an extended luminous object** [10425-22]
- 10425 0N **Modelling of propagation and scintillation of a laser beam through atmospheric turbulence** [10425-23]
- 10425 0O **Numerical studies of laser beam propagation with phase screen method using Non-Kolmogorov atmospheric turbulence** [10425-24]
- 10425 0P **Beam wander of focused electromagnetic multi-Gaussian Schell-model beams propagation in anisotropic turbulence** [10425-25]
