**Volume 10432**

Proceedings of SPIE 0277-786X, V. 10432

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Target and Background Signatures III*, edited by Karin U. Stein, Ric Schleijsen, Proceedings of SPIE Vol. 10432 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

ISSN: 0277-786X  
ISSN: 1996-756X (electronic)

ISBN: 9781510613287  
ISBN: 9781510613294 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Authors*  
vii *Conference Committee*

---

## **SESSION 1    OPTIMIZING CAMOUFLAGE**

---

- 10432 02    **Spectral characterization of natural backgrounds** [10432-1]
- 10432 03    **Angular dependance of spectral reflection for different materials (Best Student Paper)**  
[10432-2]
- 10432 04    **Optical polarization: background and camouflage** [10432-3]
- 10432 05    **Selected issues connected with determination of requirements of spectral properties of camouflage patterns** [10432-4]
- 10432 06    **Evaluation of camouflage pattern performance of textiles by human observers and CAMAELEON** [10432-6]
- 10432 07    **Hyperspectral discrimination of camouflaged target** [10432-7]

---

## **SESSION 2    TARGET SIGNATURE ANALYSIS**

---

- 10432 08    **Hyperspectral target detection analysis of a cluttered scene from a virtual airborne sensor platform using MuSES (Invited Paper)** [10432-8]
- 10432 09    **Hyperheat: a thermal signature model for super- and hypersonic missiles** [10432-9]
- 10432 0A    **Infrared measurements of launch vehicle exhaust plumes** [10432-10]
- 10432 0D    **Simulation of an oil film at the sea surface and its radiometric properties in the SWIR**  
[10432-13]

---

## **SESSION 3    HIDING FOR HUMAN OBSERVERS**

---

- 10432 0E    **Examination of soldier target recognition with direct view optics** [10432-14]
- 10432 0F    **Dependency of human target detection performance on clutter and quality of supporting image analysis algorithms in a video surveillance task** [10432-15]
- 10432 0G    **Mirage: a visible signature evaluation tool** [10432-16]
- 10432 0H    **Comparing synthetic imagery with real imagery for visible signature analysis: human observer results** [10432-17]

10432 0I **Target acquisition modeling over the exact optical path: extending the EOSTAR TDA with the TOD sensor performance model** [10432-18]

---

**SESSION 4 AUTOMATED TARGET RECOGNITION**

---

10432 0J **Automatic target recognition and detection in infrared imagery under cluttered background** [10432-19]

10432 0K **Video change detection for fixed wing UAVs** [10432-20]

10432 0L **Automatic visibility retrieval from thermal camera images** [10432-21]

10432 0M **A comparative study on methods of improving SCR for ship detection in SAR image** [10432-22]

10432 0N **SAR image dataset of military ground targets with multiple poses for ATR** [10432-23]

10432 0O **Automatic x-ray image segmentation and clustering for threat detection** [10432-24]

---

**POSTER SESSION**

---

10432 0Q **Small target detection using objectness and saliency** [10432-27]

10432 0R **An object detection and tracking system for unmanned surface vehicles** [10432-28]

10432 0S **Airport object extraction based on visual attention mechanism and parallel line detection** [10432-29]
