

49th ANNUAL LASER DAMAGE SYMPOSIUM
Proceedings

**SPIE. LASER
DAMAGE**

LASER-INDUCED DAMAGE IN OPTICAL MATERIALS 2017

24–27 September 2017
Boulder, Colorado

Editors

Gregory J. Exarhos, Vitaly E. Gruzdev, Joseph A. Menapace, Detlev Ristau, MJ Soileau

Organized by
SPIE

Cosponsored by

Spica Technologies, Inc. (United States)
Lawrence Livermore National Laboratory (United States)
Materion Corporation
ZC Optoelectronic Technologies, Ltd. (China)

Cooperating Organizations

CREOL & FPCE, College of Optics and Photonics, University of Central Florida (United States)
Pacific Northwest National Laboratory (United States)
Laser Zentrum Hannover e.V. (Germany)
University of Missouri-Columbia (United States)
Alpine Research Optics (United States)
Arrow Thin Films (United States)
Quantel Laser USA (United States)
LIDARIS LIDT Service (Lithuania)
Laser Components USA, Inc. (United States)

Founding Organizers

Arthur H. Guenther and Alexander J. Glass

Published by
SPIE

Proceedings of SPIE, 0277-786X, v. 10447

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser-Induced Damage in Optical Materials 2017*, edited by Gregory J. Exarhos, Vitaly E. Gruzdev, Joseph A. Menapace, Detlev Ristau, MJ Soileau, Proceedings of SPIE Vol. 10447 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

§ The first five digits correspond to the SPIE volume number.

§ The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	Authors
ix	Conference Committee
xi	Symposium Welcome G. J. Exarhos
xv	Tribute to Prof. Mireille Commandre V. E. Gruzdev
xvii	Summary of Meeting V. E. Gruzdev

SURFACES, MIRRORS, AND CONTAMINATION I

10447 02	Damage sources for the NIF Grating Debris Shield (GDS) and methods for their mitigation (Keynote Paper) [10447-1]
10447 03	Contamination, debris, and shrapnel generation arising from large area laser target interactions [10447-2]

SURFACES, MIRRORS, AND CONTAMINATION II

10447 05	CW laser damage testing of RAR nano-textured fused silica and YAG [10447-4]
10447 06	Laser damage of optical windows with random antireflective surface structures on both interfaces [10447-5]
10447 08	Growth of laser-induced damage on the exit surface of fused silica optics with a millimetric laser beam [10447-7]

FUNDAMENTAL MECHANISMS I

10447 0B	Laser-induced modifications in fused silica up to damage initiation caused by multiple UV nanosecond pulses [10447-10]
10447 0C	Enhancement of light intensity related to distribution of defects in the final optics assembly [10447-11]

FUNDAMENTAL MECHANISMS II

10447 0H	First principles simulation of the dynamics of transient warm dense matter during the formation of ultrashort laser pulse induced damage using the particle-in-cell method [10447-16]
----------	--

THIN FILMS I

- 10447 0U **Next-generation all-silica coatings for UV applications** [10447-30]
10447 0V **Optimal coating solution for the total internal reflection surface of zig-zag slab laser amplifier** [10447-31]

THIN FILMS II

- 10447 0W **Pulsed laser damage resistance of nano-structured high reflectors for 355nm** [10447-32]
10447 0X **355-nm, nanosecond laser mirror thin film damage competition** [10447-33]
10447 0Y **Time resolved digital holography measurements of the nonlinear optical filters** [10447-34]
10447 0Z **Characterization of laser induced damage of HR coatings with picosecond pulses** [10447-35]

THIN FILMS III

- 10447 12 **Approaches toward optimized laser-induced damage thresholds of dispersive compensating mirrors applying nanolaminates** [10447-38]
10447 14 **Comparison of aging effects in hafnia and titania thin films on the laser damage resistance of high reflection coatings for 1054 nm** [10447-40]
10447 17 **Link between mechanical strength and laser damage threshold for antireflective coating made by sol-gel** [10447-43]

MATERIALS AND MEASUREMENTS I

- 10447 19 **Nanosecond multiple pulse measurements and the different types of defects (Keynote Paper)** [10447-45]
10447 1A **Multiple pulse nanosecond laser induced damage threshold on hybrid mirrors** [10447-46]
10447 1B **Large-area defect mapping for laser damage prediction** [10447-47]
10447 1D **Photothermal measurements of absorption in LBO with a "proxy pump" calibration technique** [10447-49]

MATERIALS AND MEASUREMENTS II

- 10447 1E **U.S. National Committee proposed revision to the ISO Laser Damage Standard** [10447-50]
10447 1F **Characterization of 1-on-1 damage in high reflectors using the spatially-temporally resolved optical laser-induced damage (STEREO-LID) technique** [10447-51]
10447 1G **Damage testing of nematic liquid crystalline materials for femtosecond to nanosecond pulse lengths at 1053 nm** [10447-52]

POSTER SESSION: SURFACES, MIRRORS, AND CONTAMINATION

- 10447 1L **Development of optimal mitigation contours and their machining flow by micro-milling to improve the laser damage resistance of KDP crystal** [10447-57]

POSTER SESSION: MATERIALS AND MEASUREMENTS

- 10447 1N **Bulk absorption properties of LBO crystals** [10447-62]
- 10447 1Q **Uncertainty on areal defect density measurements** [10447-65]
- 10447 1R **A method for the determination of defect density from standard damage frequency measurements** [10447-66]
- 10447 1S **An empirical investigation of the laser survivability curve: VIII-summary** [10447-67]
- 10447 1T **Superficial modification of a Ti-6Al-4V alloy by laser peening** [10447-68]
- 10447 1U **MELBA: a fully customizable laser for damage experiments** [10447-69]
- 10447 1V **Calibration accuracy of laser calorimetry for common crystal geometries** [10447-70]
- 10447 1W **Quantitative absorption data from thermally induced wavefront distortions on UV, Vis, and NIR optics** [10447-71]
- 10447 1Y **Visual defects diffraction in high power lasers: impact on downstream optics** [10447-89]

POSTER SESSION: FUNDAMENTAL MECHANISMS

- 10447 1Z **Kinetic model of optical damage in transparent crystals under continuous-wave laser irradiation** [10447-72]
- 10447 20 **Model for visualizing high energy laser (HEL) damage** [10447-73]

POSTER SESSION: THIN FILMS

- 10447 26 **HfO₂-SiO₂ mixed film deposited by ion assisted deposition coevaporation** [10447-79]
- 10447 28 **High LIDT mirrors for 355nm wavelength based on combined ion beam sputtering and glancing angle deposition technique** [10447-81]
- 10447 29 **A comparison of LIDT behavior of metal-dielectric mirrors in ns and ps pulse regime at 1030 nm with regard to the coating technology** [10447-82]
- 10447 2A **Measurement of the nonlinear refractive index in optical thin films** [10447-83]
- 10447 2B **Influence of temperature and environment on the laser damage threshold of ion-beam sputtered anti-reflective coatings at 355 nm wavelength** [10447-84]
- 10447 2E **Testing the limits of the Stoney Equation for assessing stress in thin films from interferometric wavefront deformation measurements** [10447-87]
- 10447 2F **Recent improvements in LIDT of optical components for pulsed and CW applications** [10447-90]
