SPIE

Volume 10470

Proceedings of SPIE 1605-7422, V. 10470

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Endoscopic Microscopy XIII*, edited by Guillermo J. Tearney, Thomas D. Wang, Melissa J. Suter, Proceedings of SPIE Vol. 10470 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

LUNG INJURY, MONITORING AND TREATMENT

10470 0H	PDI using nebulized indocyanine green for pneumonia treatment [10470-16]
----------	---

OPTICAL IMAGING PROBE DESIGNS

10470 0M	Full optical model of micro-endoscope with optical coherence microscopy, multiphoton microscopy and visible capabilities [10470-21]
----------	--

NEW ENDOSCOPIC TECHNOLOGIES AND ADVANCES I

10470 12	A compressed sensing approach for resolution improvement in fiber-bundle based endomicroscopy [10470-37]
10470 15	Wide-field phase imaging for the endoscopic detection of dysplasia and early-stage esophageal cancer [10470-41]

NEW ENDOSCOPIC TECHNOLOGIES AND ADVANCES II

10470 16	Dual-channel (green and red) fluorescence microendoscope with subcellular resolution [10470-42]
10470 1A	Observation of rat's colon polyps in real time by mini-endoscopy and Raman spectroscopy [10470-46]
