SPIE

**Volume 10487**

Proceedings of SPIE 0277-786X, V. 10487

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Biomedical Imaging XIII*, edited by Fred S. Azar, Xavier Intes, Proceedings of SPIE Vol. 10487 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 1605-7422

ISSN: 1996-756X (electronic)

---

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii	<i>Conference Committee</i>

---

## MULTIMODALITY/MULTISCALE IMAGING

---

10487 09	Frequency-domain photoacoustic and fluorescence microscopy: application on labeled and unlabeled cells [10487-8]
----------	--

---

## CLINICAL APPLICATIONS

---

10487 0D	Multi-modality photoacoustic tomography, ultrasound, and light sheet microscopy for volumetric tumor margin detection [10487-12]
10487 0E	Measurements of coherent hemodynamics to enrich the physiological information provided by near-infrared spectroscopy (NIRS) and functional MRI [10487-13]
10487 0F	A polarization sensitive hyperspectral imaging system for detection of differences in tissue properties [10487-14]
10487 0H	Endoscopic hyperspectral imaging: light guide optimization for spectral light source [10487-16]

---

## DIFFUSE OPTICS

---

10487 0K	X-ray luminescence imaging of water, air, and tissue phantoms [10487-19]
10487 0L	High sensitivity optical molecular imaging system [10487-20]
10487 0M	Optimization of the conical mirror design based on Monte Carlo simulations for fluorescence molecular tomography [10487-21]

---

## POSTER SESSION

---

10487 0N	Breast cancer Ki67 expression preoperative discrimination by DCE-MRI radiomics features [10487-22]
10487 0O	X-ray luminescence computed tomography imaging via multiple intensity weighted narrow beam irradiation [10487-23]
