SPIE

Volume 10492

Proceedings of SPIE 1605-7422, V. 10492

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Interactions with Tissue and Cells XXIX*, edited by E. Duco Jansen, Hope T. Beier, Proceedings of SPIE Vol. 10492 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 ULTRAFAST PULSED LASER INTERACTIONS

- 10492 04 **Infrared laser damage thresholds in corneal tissue phantoms using femtosecond laser pulses** [10492-3]
- 10492 05 **Femtosecond laser assisted photo-transfection and differentiation of mouse embryonic stem cells** [10492-4]
- 10492 06 **Highlighting the nuances behind interaction of picosecond pulses with human skin: relating distinct laser-tissue interactions to their potential in cutaneous interventions** [10492-44]

SESSION 2 PHOTOTHERMAL EFFECTS

- 10492 07 **Porcine skin damage thresholds for pulsed nanosecond-scale laser exposure at 1064 nm** [10492-6]
- 10492 09 **Photothermal effect of infrared lasers on ex vivo lamb brain tissues** [10492-9]

SESSION 3 PHOTOMECHANICAL EFFECTS

- 10492 0B **Performance of Er:YAG laser ablation of hard bone under different irrigation water cooling conditions** [10492-11]
- 10492 0D **Quantitative evaluation of the safety of mucosal incision and submucosal dissection for colon during endoscopic submucosal dissection using carbon dioxide laser** [10492-13]

SESSION 4 LASER MODULATION OF CELLS

- 10492 0E **Myocardial electrical conduction blockade time dominated by irradiance on photodynamic reaction: in vitro and in silico study** [10492-14]
- 10492 0G **Control of intracellular ionic concentrations by mid-infrared laser irradiation** [10492-16]

SESSION 5 NOVEL APPLICATIONS OF LASERS IN BIOSYSTEMS

- 10492 0I **Frequency of resonance of human sweat duct in different modes of operation** [10492-18]

- 10492 OJ **Continuous optical measurement system of hemolysis during a photosensitization reaction using absorption spectrum** [10492-19]
- 10492 OK **Light scattering influence in cyanobacteria suspensions inside a photobioreactor** [10492-20]
- 10492 OM **Characterization of the Cherenkov scatter function for use in superficial dose measurement from external beam radiation treatments** [10492-22]

SESSION 6 OPTICAL PROPERTIES OF TISSUES

- 10492 OP **Optical coefficient measurements using bulk living tissue by an optical fiber puncture with FOV change** [10492-26]
- 10492 OQ **Regression models for real-time estimation of optical and structural sample properties from subdiffusive spatially resolved reflectance** [10492-27]

SESSION 7 NUMERICAL APPROACHES SIMULATING LASER-TISSUE INTERACTIONS

- 10492 OT **Monte Carlo modeling of fluorescence in semi-infinite turbid media** [10492-30]
- 10492 OV **Raman Monte Carlo simulation for light propagation for tissue with embedded objects** [10492-32]

POSTER SESSION

- 10492 OX **Comparison of light absorption levels with different skin phantoms and the Monte Carlo simulation using Fourier-domain optical coherence tomography** [10492-33]
- 10492 OZ **Effect of two laser photobiomodulation application protocols on the viability of random skin flap in rats** [10492-35]
- 10492 10 **Assessment of varying width illumination in hyperspectral push-broom system for scattering anisotropy measurements** [10492-36]
- 10492 15 **Fullerene C60 and graphene photosensibles for photodynamic virus inactivation** [10492-41]
- 10492 16 **Focusing light through random photonic layers by four-element division algorithm** [10492-43]
- 10492 17 **Deep-tissue two-photon imaging in brain and peripheral nerve with a compact high-pulse energy ytterbium fiber laser** [10492-45]
