Volume 10504

Proceedings of SPIE, 1605-7422, V. 10504

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophysics, Biology and Biophotonics III: the Crossroads*, edited by Adam Wax, Vadim Backman, Proceedings of SPIE Vol. 10504 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Authors*
- vii *Conference Committee*

SUPERRESOLUTION AND THE IMAGING OF THE GENOME

- 10504 09 **Detection and identification of amino acids in Ficoll solutions with femtosecond laser-induced breakdown spectroscopy [10504-8]**

NEW TECHNOLOGIES IN MEDICAL DIAGNOSTICS

- 10504 0D **Label-free in vitro prostate cancer cell detection via photonic-crystal biosensor [10504-12]**

IMAGING CELLULAR AND MOLECULAR DYNAMICS AND BIOMECHANICS

- 10504 0G **Label-free Fourier filtered dark-field imaging to quantify subcellular dynamics [10504-15]**
- 10504 0H **Diffusion of fluorescent poly(vinyl-alcohol) linear chains in semi-dilute poly(vinyl-alcohol) polymeric solutions [10504-16]**
- 10504 0J **Dual scale biomechanics of extracellular matrix proteins probed by Brillouin scattering and quasistatic tensile testing [10504-18]**

POSTER SESSION

- 10504 0L **Machine learning based analysis of human prostate cancer cell lines at different metastatic ability using native fluorescence spectroscopy with selective excitation wavelength [10504-20]**
- 10504 0M **Time-zoomable FRET spectroscopy with a 512 x16 SPAD line sensor [10504-21]**
