Volume 10508

Proceedings of SPIE 1605-7422, V. 10508

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Reporters, Markers, Dyes, Nanoparticles, and Molecular Probes for Biomedical Applications X*, edited by Samuel Achilefu, Ramesh Raghavachari, Proceedings of SPIE Vol. 10508 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

THERANOSTICS AND NIR FLUORESCENCE IMAGING STRATEGIES

- 10508 03 **Clinically translatable nanotheranostic platforms for peripheral nerve regeneration: design with outcome in mind** [10508-7]
10508 05 **Dual-radiolabeled nanoparticle probes for depth-independent in vivo imaging of enzyme activation** [10508-22]
10508 06 **Red and near-infrared fluorophores inspired by chlorophylls: consideration of practical brightness in multicolor flow cytometry and biomedical sciences (Invited Paper)** [10508-26]

MOLECULAR AND PHYSIOLOGICAL IMAGING STRATEGIES AND PROBES

- 10508 09 **Effect of linkers on the $\alpha_v\beta_3$ integrin targeting efficiency of cyclic RGD-conjugates** [10508-25]

NANOIMAGING PLATFORMS

- 10508 0G **Ultrasmall visible-to-near-infrared emitting silver-sulfide quantum dots for cancer detection and imaging** [10508-21]
10508 0H **Toxicological evaluation of Cd-based fluorescent nanoprobe by means of in vivo studies** [10508-6]

POSTER SESSION

- 10508 0K **The deflection of carbon composite carbon nanotube / graphene using molecular dynamics simulation** [10508-13]
10508 0L **Mechanical properties of oxygen-doped porous carbon nanostructures** [10508-14]
10508 0M **Control method conductive properties ZnS quantum dots** [10508-15]
10508 0N **Pillared graphene on the basis of zigzag carbon nanotubes for adsorption in medicine: mechanical properties** [10508-16]
10508 0P **Perspectives of graphene-nucleotide complexes for the development of new bioelectronics devices** [10508-18]

- 10508 0Q **In silico study of liposome transport across biomembranes** [10508-19]
- 10508 0R **Investigation of the mechanism for penetration of low density lipoprotein into the arterial wall** [10508-20]
