**Volume 10514**

Proceedings of SPIE 0277-786X, V. 10514

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Diode Laser Technology XVI*, edited by Mark S. Zediker, Proceedings of SPIE Vol. 10514 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510615137

ISBN: 9781510615144 (electronic)

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

---

## SESSION 1 NEW HIGH POWER WAVELENGTHS

---

10514 02	<b>Blue 450nm high power semiconductor continuous wave laser bars exceeding rollover output power of 80W (Invited Paper)</b> [10514-1]
10514 03	<b>700 W blue fiber-coupled diode-laser emitting at 450 nm</b> [10514-2]
10514 04	<b>Recent progress of 638-nm high-power broad area laser diodes in Mitsubishi Electric</b> [10514-3]
10514 05	<b>Next generation DIRCM for 2.1 -2.3 micron wavelength based on direct-diode GaSb technology</b> [10514-4]
10514 07	<b>Blue laser diode (450 nm) systems for welding copper</b> [10514-6]
10514 08	<b>Visible high power fiber coupled diode lasers</b> [10514-7]

---

## SESSION 2 HIGH POWER DIODE LASER TECHNOLOGY I

---

10514 0A	<b>Extreme triple asymmetric (ETAS) epitaxial designs for increased efficiency at high powers in 9xx-nm diode lasers</b> [10514-9]
10514 0B	<b>High polarization purity operation of 99% in 9xx-nm broad stripe laser diodes</b> [10514-10]
10514 0D	<b>Development of highly efficient laser bars emitting at around 1060 nm for medical applications</b> [10514-12]
10514 0E	<b>970-nm ridge waveguide diode laser bars for high power DWBC systems</b> [10514-13]

---

## SESSION 3 HIGH POWER DIODE LASER TECHNOLOGY II

---

10514 0F	<b>Diode lasers optimized in brightness for fiber laser pumping</b> [10514-14]
10514 0G	<b>Next generation diode lasers with enhanced brightness</b> [10514-15]
10514 0H	<b>Advancements of ultra-high peak power laser diode arrays</b> [10514-16]

10514 0I     **Advances in infrared high power lasers for long term operation** [10514-17]

---

**SESSION 4     HIGH POWER FIBER COUPLED SOURCES**

---

10514 0J     **High-power fiber-coupled pump lasers for fiber lasers** [10514-18]

10514 0K     **Efficient pump module coupling >1kW from a compact detachable fiber** [10514-19]

10514 0L     **Improvement in reduced-mode (REM) diodes enable 315 W from 105- $\mu$ m 0.15-NA fiber-coupled modules** [10514-20]

10514 0M     **120W, NA\_0.15 fiber coupled LD module with 125- $\mu$ m clad/NA 0.22 fiber by spatial coupling method** [10514-21]

10514 0N     **High brightness KW-class direct diode laser** [10514-22]

10514 0O     **Ultracompact hermetic laser diode modules for harsh environment** [10514-23]

10514 0P     **Continued advances in high brightness fiber-coupled laser modules for efficient pumping of fiber and solid-state lasers** [10514-24]

---

**SESSION 5     WAVELENGTH STABILIZED DEVICES I**

---

10514 0S     **Auto-locking waveguide amplifier system for lidar and magnetometric applications** [10514-27]

---

**SESSION 6     WAVELENGTH STABILIZED DEVICES II**

---

10514 0T     **Coherent combining of high brightness tapered lasers in master oscillator power amplifier configuration** [10514-28]

10514 0U     **Improvements to tapered semiconductor MOPA laser design and testing** [10514-29]

10514 0V     **Wavelength stabilized DBR high power diode laser using EBL optical confining grating technology** [10514-30]

10514 0W     **High-power and brightness laser diode modules using new DBR chips** [10514-31]

10514 0X     **Distributed Bragg reflector tapered diode lasers emitting more than 10 W at 1154 nm** [10514-32]

---

**SESSION 7     HIGH PERFORMANCE BAR TECHNOLOGY**

---

10514 0Y     **Advanced chip designs and novel cooling techniques for brightness scaling of industrial, high power diode laser bars (Invited Paper)** [10514-33]

10514 02    **High-resolution smile measurement and control of wavelength-locked QCW and CW laser diode bars** [10514-34]

---

**POSTER SESSION**

---

10514 15    **High power line generating diode lasers** [10514-40]
