SPIE

**Volume 10525**

Proceedings of SPIE 0277-786X, V. 10525

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems VII*, edited by Stefan Kaieler, Stefan W. Heinemann, Proceedings of SPIE Vol. 10525 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

---

## LASE PLENARY SESSION

---

10525 02	<b>Advanced industrial laser systems and applications (Plenary Paper)</b> [10525-203]
----------	---

---

## SESSION 1 SYSTEMS I

---

10525 03	<b>The Laser Megajoule facility: laser performances and comparison with computational simulation</b> [10525-1]
10525 04	<b>Multi-physical modeling of thermal and dispersive effects in optical systems for high power ultra-short laser pulses</b> [10525-2]
10525 05	<b>Tuneable UV solid-state laser lines for surface processing</b> [10525-3]
10525 06	<b>Influence of thermally induced aberrations on resulting intensity distribution</b> [10525-4]
10525 07	<b>Beam shaping of focused radiation of multimode lasers</b> [10525-5]

---

## SESSION 2 SYSTEMS II

---

10525 08	<b>Improving accuracy of robot-guided 3D laser surface processing by workpiece measurement in a blink</b> [10525-6]
10525 09	<b>Mobile laser cutting system for complex rescue operations</b> [10525-7]
10525 0A	<b>Ball-shaped end caps for fiber laser systems</b> [10525-8]
10525 0B	<b>Measurement of the dispersion properties of large aperture mirrors at arbitrary incidence angle and polarization state</b> [10525-9]

---

## SESSION 3 WELDING AND CUTTING

---

10525 0C	<b>BrightLine weld-spatter reduced high speed welding with disk lasers</b> [10525-11]
10525 0D	<b>Pores in laser beam welding: generation mechanism and impact on the melt flow</b> [10525-12]
10525 0E	<b>New welding techniques and laser sources for battery welding</b> [10525-13]

10525 OF **New milestones in laser cutting for quality improvement and process automation**  
[10525-26]

---

**SESSION 4 SURFACE TREATMENT I**

---

10525 OG **Research on inorganic cladding of neodymium phosphate glass in slab amplifier**  
[10525-15]

10525 OH **Backscattered light properties during femtosecond laser ablation and development of a dynamic interferometric focusing system** [10525-16]

10525 OI **Laser beam ablation of thick steel plates without affecting the material underneath**  
[10525-17]

10525 OJ **Femtosecond pulsed laser deposition of a boron thin film aiming at the development of a low-cost neutron detector** [10525-18]

10525 OL **Approaches for increasing process rate of local 3D laser decoating for series production of hybrid composites** [10525-20]

---

**SESSION 5 SURFACE TREATMENT II**

---

10525 OM **Influence of operating parameters on morphology of laser hardened surfaces** [10525-22]

10525 ON **Development of high power laser ablation process for polycrystalline diamond polishing: Part 1. Fundamental understanding of PCD ultra-short pulsed laser ablation** [10525-23]

10525 OO **High pulse energy kW average power nanosecond lasers enable breakthrough in rapid coating removal** [10525-24]
