

PROCEEDINGS OF SPIE

Organic Photonic Materials and Devices XX

**Christopher E. Tabor
François Kajzar
Toshikuni Kaino
Yasuhiro Koike**
Editors

**31 January – 1 February 2018
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 10529

Proceedings of SPIE 0277-786X, V. 10529

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Photonic Materials and Devices XX*, edited by Christopher E. Tabor, François Kajzar, Toshikuni Kaino, Yasuhiro Koike, Proceedings of SPIE Vol. 10529 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

OLEDs

10529 06	Three-dimensional (3D) concave OLEDs fabricated by a multilayer coating technique of electro spray deposition (ESD) (Invited Paper) [10529-5]
10529 09	Two-photon absorption in layered transition metal dichalcogenides (Invited Paper) [10529-8]

HYBRID MATERIALS

10529 0I	Improved perovskite phototransistor prepared using multi-step annealing method [10529-15]
----------	--

EO/NLO POLYMERS

10529 0K	Multi-scale theory-assisted nano-engineering of plasmonic-organic hybrid electro-optic device performance (Keynote Paper) [10529-18]
10529 0L	Review of biomaterials for electronics and photonics (Invited Paper) [10529-19]

SOLAR CELLS

10529 0R	Polymer nanofiber-carbon nanotube network generating circuits [10529-25]
----------	---

MATERIALS

10529 0V	3D printing of optical materials: an investigation of the microscopic properties (Invited Paper) [10529-29]
10529 0W	3D-printed optical active components [10529-30]
10529 0X	Influence of polymer matrix in the luminous efficiency of organic light-emitting electrochemical cells [10529-31]

PHOTO CHEMISTRY

- 10529 0Z **Effect of molecular side groups and local nanoenvironment on photodegradation and its reversibility** [10529-33]

BIOPHOTONICS

- 10529 11 **Multiscale conformational dynamics probed by time-resolved circular dichroism (Invited Paper)** [10529-35]

POSTER SESSION

- 10529 14 **Enhancement of the inverted polymer solar cells via ZnO doped with CTAB** [10529-38]
- 10529 15 **Efficient hole-conductor-free printable mesoscopic perovskite solar cells based on hybrid carbon electrodes** [10529-40]
- 10529 17 **Polarized light scattering by macromolecular self-assembly of J-aggregates** [10529-42]
- 10529 19 **Characteristic changes of vapor deposited films for bis-styrylbenzene derivatives after thermal treatment** [10529-44]
- 10529 1D **Probing metal-to-ligand charge transfer transitions in ruthenium complexes by quantitative two-photon absorption spectroscopy** [10529-48]
- 10529 1E **Electro-optic polymeric reflection modulator based on plasmonic metamaterial** [10529-49]
