

PROCEEDINGS OF SPIE

Ultrafast Phenomena and Nanophotonics XXII

Markus Betz
Abdulahkem Y. Elezzabi
Editors

29–31 January 2018
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 10530

Proceedings of SPIE 0277-786X, V. 10530

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ultrafast Phenomena and Nanophotonics XXII*, edited by Markus Betz, Abdulhakem Y. Elezabi, Proceedings of SPIE Vol. 10530 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

NONLINEAR OPTICS I

10530 03	Giant anisotropic nonlinear optical response in Weyl semimetals (Invited Paper) [10530-2]
10530 05	Formation of sub-femtosecond sub-pulses at THG of femtosecond laser pulse [10530-4]

PLASMONICS

10530 0B	Optoelectronic metasurfaces: modulation and detection (Invited Paper) [10530-10]
10530 0C	A space-time analysis of electron emission from a focusing structure for surface plasmon polaritons using photoemission microscopy (Invited Paper) [10530-11]
10530 0D	Propagation of surface plasmons along low-dimensional materials (Invited Paper) [10530-12]
10530 0E	Using resistive readout to probe ultrafast dynamics of a plasmonic sensor [10530-13]

ULTRAFAST NANOPHOTONICS

10530 0G	Coherent optical spectroscopy of charged exciton complexes in semiconductor nanostructures (Invited Paper) [10530-15]
----------	--

PHONON DYNAMICS

10530 0N	Coherent phonon dynamics in misfit-layered chalcogenide LaVS_3 crystal (Invited Paper) [10530-22]
----------	--

NONLINEAR OPTICS II

10530 0Q	Ultrafast zero-bias photocurrent in GeS nanosheets (Invited Paper) [10530-25]
----------	--

ULTRAFAST CARRIER DYNAMICS

- 10530 OT **Towards femtosecond electronics based on single-walled carbon nanotubes (Invited Paper)** [10530-28]
- 10530 OV **Ultrafast orbital manipulation and Mott physics in multi-band correlated materials (Invited Paper)** [10530-30]
- 10530 OX **Femtosecond pump-probe study of negative electron affinity GaAs/AlGaAs photocathodes** [10530-32]

GRAPHENE AND ORGANIC THIN FILMS

- 10530 OZ **Landau-Zener-Stückelberg interferometer on attosecond timescales in graphene (Invited Paper)** [10530-34]
- 10530 12 **Laser-assisted field emission in single-walled carbon nanotubes** [10530-37]

TRANSITION METAL DICHALCOGENIDES

- 10530 15 **Optical spectroscopy of interlayer excitons in TMDC heterostructures: exciton dynamics, interactions, and giant valley-selective magnetic splitting (Invited Paper)** [10530-40]
- 10530 16 **Valley-selective photon-dressed states in transition metal dichalcogenides (Invited Paper)** [10530-41]

POSTER SESSION

- 10530 18 **Subwavelength imaging and control of ultrafast optical near field in nanosized bowtie and ring** [10530-44]
- 10530 1A **Observing the sub-femtosecond dynamics of plasmonic Bragg reflectors by time-resolved photoemission electron microscopy** [10530-49]
