SPIE

Volume 10532

Proceedings of SPIE 0277-786X, V. 10532

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Gallium Nitride Materials and Devices XIII*, edited by Jen-Inn Chyi, Hiroshi Fujioka, Hadis Morkoç, Proceedings of SPIE Vol. 10532 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Authors*
vii *Conference Committee*

GROWTH I

- 10532 04 **Characteristics of AlN layer on four-inch sapphire substrate by high-temperature annealing in nitrogen atmosphere** [10532-3]

GROWTH II

- 10532 08 **Recent progress in nonpolar and semi-polar GaN light emitters on patterned Si substrates (Invited Paper)** [10532-7]

NEW MATERIALS

- 10532 0K **Radiation and process-induced damage in Ga₂O₃ (Invited Paper)** [10532-19]

CHARACTERIZATION II

- 10532 0R **Alloy fluctuations at dislocations in III-nitrides: identification and impact on optical properties (Invited Paper)** [10532-26]
- 10532 0W **Demonstration of AlGaIn-delta-GaN QW by plasma-assisted molecular beam epitaxy for 260-nm ultraviolet light emitting diodes** [10532-31]

ELECTRON DEVICES

- 10532 11 **Vertical GaN-based power devices on bulk GaN substrates for future power switching systems (Invited Paper)** [10532-36]
- 10532 12 **Ga₂O₃ Schottky barrier and heterojunction diodes for power electronics applications (Invited Paper)** [10532-37]

LASERS

- 10532 16 **White-light sources based on GaN laser diodes: analysis and application study** [10532-42]
- 10532 17 **GaN laser diodes for high-power optical integration and quantum technologies** [10532-44]

- 10532 19 **Distributed feedback InGaN/GaN laser diodes** [10532-45]
- 10532 1B **Metalized monolithic high-contrast grating as a mirror for GaN-based VCSELs** [10532-47]
- 10532 1C **Continuous-wave operation of nonpolar GaN-based vertical-cavity surface-emitting lasers** [10532-83]

NANO STRUCTURE DEVICES

- 10532 1D **Growth and electronic properties of coaxial GaN-(Al,Ga,In)N core-shell nanowires (Invited Paper)** [10532-48]

NEW DEVICES

- 10532 1J **Degradation processes and origin in InGaN-based high-power photodetectors** [10532-54]
- 10532 1N **Semipolar GaN-based laser diodes for Gbit/s white lighting communication: devices to systems** [10532-84]

QUANTUM EFFICIENCY

- 10532 1P **Internal quantum efficiency of nitride light emitters: a critical perspective (Invited Paper)** [10532-59]
- 10532 1Q **Carrier lifetimes in polar InGaN-based LEDs (Invited Paper)** [10532-60]

LED I

- 10532 1U **Plasma-assisted molecular beam epitaxy of GaN nanowires on epitaxial single-layer graphene (Invited Paper)** [10532-64]

LED II

- 10532 1X **Recent progress on GaN-based superluminescent light-emitting diodes in the visible range (Invited Paper)** [10532-67]

POSTER SESSION

- 10532 25 **AlGaIn/GaN metal-insulator-semiconductor capacitors with a buried Mg doped layer characterized by deep level transient spectroscopy and photoluminescence** [10532-39]
- 10532 26 **Investigation of GaN-based light-emitting diodes on various substrates** [10532-66]
- 10532 28 **Optical simulations of blue and green semipolar InGaIn/GaN lasers** [10532-77]
