SPIE

**Volume 10584**

Proceedings of SPIE 0277-786X, V. 10584

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Novel Patterning Technologies 2018*, edited by Eric M. Panning, Martha I. Sanchez, Proceedings of SPIE Vol. 10584 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

---

## INVITED SESSION: SCANNING PROBE PATTERNING

---

10584 04	<b>High-throughput scanning probe instruments for nanopatterning, alignment, and overlay metrology (Invited Paper) [10584-3]</b>
10584 05	<b>Thermal scanning probe lithography: from spintronics to biomedical applications (Invited Paper) [10584-4]</b>
10584 06	<b>Field-emission scanning probe lithography with self-actuating and self-sensing cantilevers for devices with single digit nanometer dimensions (Invited Paper) [10584-5]</b>

---

## NOVEL LITHOGRAPHY AND ALTERNATIVE PATTERNING I

---

10584 07	<b>The state of the art in multicolor visible photolithography (Invited Paper) [10584-6]</b>
10584 08	<b>Multi-color approach on self-aligned multiple patterning for single line cut application [10584-7]</b>
10584 09	<b>Helium ion active hybrid non-chemically amplified resist (n-CAR) for sub-10 nm patterning applications [10584-8]</b>

---

## SELF-ASSEMBLY

---

10584 0C	<b>Precise control of template affinity achieved by UV-assisted graphoepitaxy approach on silicon nanowires applications [10584-11]</b>
----------	---

---

## E-BEAM LITHOGRAPHY

---

10584 0F	<b>e-beam direct write: why it's always left standing at the altar of new nodes (Invited Paper) [10584-14]</b>
10584 0G	<b>Performance validation of Mapper's FLX-1200 (Invited Paper) [10584-15]</b>

10584 OH      **Multi-beam mask writer MBM-1000** [10584-16]

---

**DSA MATERIALS AND CHARACTERIZATION: JOINT SESSION WITH CONFERENCES 10586 AND 10584**

---

10584 OK      **Studying the effects of chemistry and geometry on DSA hole-shrink process in three dimensions**  
[10584-19]

---

**DSA MATERIALS AND INTEGRATION: JOINT SESSION WITH CONFERENCES 10586 AND 10584**

---

10584 OL      **The integration of 193i and DSA for BEOL metal cuts/blocks targeting sub-20nm tip-to-tip CD**  
[10584-20]

10584 OM      **Defect and roughness reduction of chemo-epitaxy DSA pattern** [10584-21]

10584 ON      **Evaluation of line-edge/line-width roughness of directed self-assembled PS-*b*-PMMA patterns using coarse-grained molecular dynamics simulation** [10584-22]

---

**NANOIMPRINT LITHOGRAPHY MASKS AND SYSTEMS**

---

10584 OQ      **Performance of a nanoimprint mask replication system** [10584-25]

10584 OR      **Design for nanoimprint lithography: hot spot modification through total NIL process simulation**  
[10584-26]

10584 OS      **A novel resist system for enhanced resist spreading in nanoimprint lithography** [10584-27]

---

**NANOIMPRINT LITHOGRAPHY FOR HIGH VOLUME MANUFACTURING**

---

10584 OT      **Updates of nanoimprint lithography for production and applications for next generation memory devices (Invited Paper)** [10584-28]

10584 OU      **Overlay improvements using a novel high-order distortion correction system for NIL high-volume manufacturing (Invited Paper)** [10584-29]

10584 OV      **Improvement of nano-imprint lithography performance for device fabrication** [10584-30]

---

**NOVEL LITHOGRAPHY AND ALTERNATIVE PATTERNING II AND 3D PATTERNING METHODS**

---

10584 OX      **3D micro-mirror lithography for mass production (Invited Paper)** [10584-32]

- 10584 0Y      **Electrochemical nanoimprinting of silicon: a direct patterning approach** [10584-33]
- 10584 0Z      **AutoSCIL 200mm tooling in production, x-ray optics, and cell growth templates** [10584-34]

---

#### NOVEL LITHOGRAPHY AND ALTERNATIVE PATTERNING III

---

- 10584 11      **Process development of a maskless N40 via level for security application with multi-beam lithography** [10584-36]
- 10584 12      **Single-nanometer accurate 3D nanoimprint lithography with master templates fabricated by NanoFrazor lithography** [10584-37]

---

#### POSTER SESSION

---

- 10584 13      **Contact/proximity stepper using UVA, UVB, and UVC light sources** [10584-38]
- 10584 14      **Green ethanol-developable electron beam lithography processes using positive tone biomass resist material** [10584-39]
- 10584 15      **Nanoimprint lithography using gas permeable template II** [10584-40]
- 10584 16      **Gas permeable template derived from cellulose in ultraviolet nanoimprint** [10584-41]
- 10584 17      **Benchmarking 3-color photoresists for multiphoton absorption lithography** [10584-42]
- 10584 18      **Thin films for high-resolution, 3-color lithography** [10584-43]
- 10584 19      ***In situ* polymerization threshold detection of 3-color systems and a study of the time dependence** [10584-44]
- 10584 1B      **Substrate damageless tri-layer process for advanced ArFi lithography** [10584-46]
- 10584 1C      **Model-based proximity effect correction for helium ion beam lithography** [10584-47]
- 10584 1D      **Process control technology for nanoimprint lithography** [10584-49]
- 10584 1E      **Mask lithographic performance investigation with computational Monte-Carlo method on advanced mask patterning** [10584-50]
- 10584 1F      **Material development for high-throughput nanoimprint lithography** [10584-48]
- 10584 1G      **Fabrication of optical nanodevices through field-emission scanning probe lithography and cryogenic etching** [10584-51]

10584 1H      **Effect of homopolymer concentration on LER and LWR in block copolymer/homopolymer blends** [10584-52]
