PROCEEDINGS OF SPIE

MIPPR 2017: Automatic Target Recognition and Navigation

Jianguo Liu Jayaram K. Udupa Hanyu Hong Editors

28–29 October 2017 Xiangyang, China

Organized by

Huazhong University of Science and Technology (China) Hubei University of Arts and Sciences (China)

Sponsored by

National Key Laboratory of Science and Technology on Multi-spectral Information Processing (China)

Huazhong University of Science and Technology (China)

Hubei University of Arts and Sciences (China)

Hubei Association of Automation (China)

Published by SPIE

Volume 10608

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in MIPPR 2017: Automatic Target Recognition and Navigation, edited by Jianguo Liu, Jayaram K. Udupa, Hanyu Hong, Proceedings of SPIE Vol. 10608 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

- xi Introduction

AUTOMATIC TARGET RECOGNITION AND NAVIGATION

The improvement of VIBE foreground detection algorithm [10608-2] An improved KCF tracking algorithm based on multi-feature and multi-scale [10608-3] Infrared maritime target detection using a probabilistic single Gaussian model of sea clutter in Fourier domain [10608-5] Low-resolution ship detection from high-altitude aerial images [10608-6] Low-resolution ship detection from high-altitude aerial images [10608-6] High-precision relative position and attitude measurement for on-orbit maintenance of spacecraft [10608-9] An advanced analysis method of initial orbit determination with too short arc data [10608-10] Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11] Dim target detection method based on salient graph fusion [10608-15] Joint image restoration and location in visual navigation system [10608-18] Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] Robust object tacking based on self-adaptive search area [10608-21] Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]		
Infrared marifime target detection using a probabilistic single Gaussian model of sea clutter in Fourier domain [10608-5] Low-resolution ship detection from high-altitude aerial images [10608-6] High-precision relative position and attitude measurement for on-orbit maintenance of spacecraft [10608-9] An advanced analysis method of initial orbit determination with too short arc data [10608-10] Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11] Dim target detection method based on salient graph fusion [10608-15] Joint image restoration and location in visual navigation system [10608-18] Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] Robust object tacking based on self-adaptive search area [10608-21] Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 02	The improvement of VIBE foreground detection algorithm [10608-2]
clutter in Fourier domain [10608-5] Low-resolution ship detection from high-altitude aerial images [10608-6] High-precision relative position and attitude measurement for on-orbit maintenance of spacecraft [10608-9] An advanced analysis method of initial orbit determination with too short arc data [10608-10] Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11] Dim target detection method based on salient graph fusion [10608-15] Joint image restoration and location in visual navigation system [10608-18] Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] Robust object tacking based on self-adaptive search area [10608-21] Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 03	An improved KCF tracking algorithm based on multi-feature and multi-scale [10608-3]
High-precision relative position and attitude measurement for on-orbit maintenance of spacecraft [10608-9] An advanced analysis method of initial orbit determination with too short arc data [10608-10] Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11] Dim target detection method based on salient graph fusion [10608-15] Joint image restoration and location in visual navigation system [10608-18] Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] Robust object tacking based on self-adaptive search area [10608-21] Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 04	
spacecraft [10608-9] 10608 07 An advanced analysis method of initial orbit determination with too short arc data [10608-10] 10608 08 Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11] 10608 09 Dim target detection method based on salient graph fusion [10608-15] 10608 0A Joint image restoration and location in visual navigation system [10608-18] 10608 0B Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] 10608 0C Robust object tacking based on self-adaptive search area [10608-21] 10608 0D Saliency detection algorithm based on LSC-RC [10608-22] 10608 0F Discussion among different methods of updating model filter in object tracking [10608-23] 10608 0F A street rubbish detection algorithm based on Sift and RCNN [10608-24] 10608 0G Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 05	Low-resolution ship detection from high-altitude aerial images [10608-6]
[10608 10] 10608 08 Gaussian mixture models-based ship target recognition algorithm in remote sensing infrared images [10608-11] 10608 09 Dim target detection method based on salient graph fusion [10608-15] 10608 0A Joint image restoration and location in visual navigation system [10608-18] 10608 0B Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] 10608 0C Robust object tacking based on self-adaptive search area [10608-21] 10608 0D Saliency detection algorithm based on LSC-RC [10608-22] 10608 0E Discussion among different methods of updating model filter in object tracking [10608-23] 10608 0F A street rubbish detection algorithm based on Sift and RCNN [10608-24] 10608 0G Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 06	·
infrared images [10608-11] 10608 09 Dim target detection method based on salient graph fusion [10608-15] 10608 0A Joint image restoration and location in visual navigation system [10608-18] 10608 0B Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] 10608 0C Robust object tacking based on self-adaptive search area [10608-21] 10608 0D Saliency detection algorithm based on LSC-RC [10608-22] 10608 0E Discussion among different methods of updating model filter in object tracking [10608-23] 10608 0F A street rubbish detection algorithm based on Sift and RCNN [10608-24] 10608 0G Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 07	•
Joint image restoration and location in visual navigation system [10608-18] Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] Robust object tacking based on self-adaptive search area [10608-21] Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 08	
Target tracking system based on preliminary and precise two-stage compound cameras [10608-20] Robust object tacking based on self-adaptive search area [10608-21] Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 09	Dim target detection method based on salient graph fusion [10608-15]

Saliency detection algorithm based on LSC-RC [10608-22] Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 OB	
Discussion among different methods of updating model filter in object tracking [10608-23] A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 0C	Robust object tacking based on self-adaptive search area [10608-21]
10608 0F A street rubbish detection algorithm based on Sift and RCNN [10608-24] Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 0D	Saliency detection algorithm based on LSC-RC [10608-22]
Complex background suppression using global-local registration strategy for the detection of small-moving target on moving platform [10608-27]	10608 0E	Discussion among different methods of updating model filter in object tracking [10608-23]
of small-moving target on moving platform [10608-27]	10608 OF	A street rubbish detection algorithm based on Sift and RCNN [10608-24]
10608 0H A new method of small target detection based on neural network [10608-28]	10608 0G	
	10608 0H	A new method of small target detection based on neural network [10608-28]

10608 01	A novel line segment detection algorithm based on graph search [10608-30]
10608 OJ	Infrared images target detection based on background modeling in the discrete cosine domain [10608-33]
10608 0K	Monocular visual odometry-based 3D-2D motion estimation [10608-36]
10608 OL	Segmentation of oil spills in SAR images by using discriminant cuts [10608-39]
10608 0M	A novel visual-inertial monocular SLAM [10608-41]
10608 0N	Infrared vehicle recognition using unsupervised feature learning based on K-feature [10608-42]
10608 0O	A threshold auto-adjustment algorithm of feature points extraction based on grid [10608-43]
10608 OP	Real-time object detection and semantic segmentation for autonomous driving [10608-44]
10608 0Q	An improved feature extraction algorithm based on KAZE for multi-spectral image [10608-46]
10608 OR	Improved CORF model of simple cell combined with non-classical receptive field and its application on edge detection [10608-47]
10608 OS	Parallax adjustment algorithm based on Susan-Zernike moments [10608-48]
