

PROCEEDINGS OF SPIE

MIPPR 2017: Pattern Recognition and Computer Vision

Zhiguo Cao
Yuehuang Wang
Chao Cai
Editors

28–29 October 2017
Xiangyang, China

Organized by
Huazhong University of Science and Technology (China)
Hubei University of Arts and Sciences (China)

Sponsored by
National Key Laboratory of Science and Technology on Multi-spectral Information Processing
(China)
Huazhong University of Science and Technology (China)
Hubei University of Arts and Sciences (China)
Hubei Association of Automation (China)

Volume 10609

Proceedings of SPIE 0277-786X, V. 10609

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *MIPPR 2017: Pattern Recognition and Computer Vision*, edited by Zhiguo Cao, Yuehuang Wang, Chao Cai, Proceedings of SPIE Vol. 10609 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committee</i>
xiii	<i>Introduction</i>

PATTERN RECOGNITION AND COMPUTER VISION

10609 02	Static facial expression recognition with convolution neural networks [10609-1]
10609 03	Feature hashing for fast image retrieval [10609-2]
10609 04	Affine invariant feature extraction based on the shape of local support region [10609-3]
10609 05	Adaptive region constrained FCM algorithm for image segmentation with hierarchical superpixels [10609-5]
10609 06	A mixture model for robust registration in Kinect sensor [10609-6]
10609 07	HOG pedestrian detection based on edge symmetry and trilinear interpolation (Invited Paper) [10609-7]
10609 08	A multi-view face recognition system based on cascade face detector and improved Dlib [10609-8]
10609 09	A framework for farmland parcels extraction based on image classification [10609-9]
10609 0A	A depth enhancement strategy for kinect depth image [10609-13]
10609 0B	The method for froth floatation condition recognition based on adaptive feature weighted [10609-17]
10609 0C	Method of segmenting river from remote sensing image [10609-19]
10609 0D	Robust image matching via ORB feature and VFC for mismatch removal [10609-20]
10609 0E	Dual-threshold segmentation using Arimoto entropy based on chaotic bee colony optimization [10609-21]
10609 0F	The selection of the optimal baseline in the front-view monocular vision system [10609-22]
10609 0G	Learning deep features with adaptive triplet loss for person reidentification [10609-23]
10609 0H	A novel approach for fire recognition using hybrid features and manifold learning-based classifier [10609-24]
10609 0I	Research on three-dimensional reconstruction method based on binocular vision [10609-25]

- 10609 OJ **Multi-modal image registration via depth information based on point set matching** [10609-26]
- 10609 OK **Scene text detection by leveraging multi-channel information and local context** [10609-32]
- 10609 OL **Selecting good regions to deblur via relative total variation** [10609-33]
- 10609 OM **Single image super-resolution based on convolutional neural networks** [10609-34]
- 10609 ON **An improved multi-paths optimization method for video stabilization** [10609-35]
- 10609 OO **Threshold-adaptive canny operator based on cross-zero points** [10609-36]
- 10609 OP **Supervised guiding long-short term memory for image caption generation based on object classes** [10609-38]
- 10609 OQ **Color correction using weighted moving least squares in image mosaicking applications** [10609-40]
- 10609 OR **A method of non-contact reading code based on computer vision** [10609-41]
- 10609 OS **Drug-related webpages classification based on multi-modal local decision fusion** [10609-42]
- 10609 OT **A new matching algorithm for affine point sets** [10609-44]
- 10609 OU **Week texture objects pose estimation based on 3D model** [10609-45]
- 10609 OV **Deep learning based hand gesture recognition in complex scenes** [10609-47]
- 10609 OW **Fast-match on particle swarm optimization with variant system mechanism** [10609-49]
- 10609 OX **Discriminative correlation filter tracking with occlusion detection** [10609-50]
- 10609 OY **A method of airborne infrared and visible image matching based on HOG feature** [10609-52]
- 10609 OZ **A method of vehicle license plate recognition based on PCANet and compressive sensing** [10609-55]
- 10609 10 **Automated railroad reconstruction from remote sensing image based on texture filter** [10609-56]
- 10609 11 **Stereo matching algorithm based on double components model** [10609-59]
- 10609 12 **Ship detection based on rotation-invariant HOG descriptors for airborne infrared images** [10609-60]
- 10609 13 **RPBS: Rotational Projected Binary Structure for point cloud representation** [10609-62]
- 10609 14 **Environmentally adaptive crop extraction for agricultural automation using super-pixel and LAB Gaussian model** [10609-63]
- 10609 15 **Improved dense trajectories for action recognition based on random projection and Fisher vectors** [10609-65]

- 10609 16 **Action recognition in depth video from RGB perspective: A knowledge transfer manner** [10609-66]
- 10609 17 **Geometry and coherence based feature matching for structure from motion** [10609-68]
- 10609 18 **Research on driver fatigue detection** [10609-69]
- 10609 19 **Smoke regions extraction based on two steps segmentation and motion detection in early fire** [10609-70]
- 10609 1A **Collaborative identification method for sea battlefield target based on deep convolutional neural networks** [10609-72]
- 10609 1B **Airplane detection in remote sensing images using convolutional neural networks** [10609-73]
- 10609 1C **Unsupervised classification of high-resolution remote-sensing images under edge constraints** [10609-74]
- 10609 1D **Modeling of biologically motivated self-learning equivalent-convolutional recurrent-multilayer neural structures (BLM_SL_EC_RMNS) for image fragments clustering and recognition (Invited Paper)** [10609-75]
- 10609 1E **Deep visual-semantic for crowded video understanding** [10609-77]
- 10609 1F **Weighted least square method for epipolar rectification in semi-calibrated image** [10609-79]
- 10609 1G **Detection of vehicle parts based on Faster R-CNN and relative position information** [10609-83]
- 10609 1H **Near infrared and visible face recognition based on decision fusion of LBP and DCT features** [10609-84]
- 10609 1I **Low, slow, small target recognition based on spatial vision network** [10609-85]
- 10609 1J **Vehicle parts detection based on Faster - RCNN with location constraints of vehicle parts feature point** [10609-86]
- 10609 1K **Hand pose estimation in depth image using CNN and random forest** [10609-87]
- 10609 1L **A fast non-local means algorithm based on integral image and reconstructed similar kernel** [10609-88]
- 10609 1M **A portable low-cost 3D point cloud acquiring method based on structure light** [10609-89]
- 10609 1N **Chinese character recognition based on Gabor feature extraction and CNN** [10609-91]
- 10609 1P **Convolutional neural network using generated data for SAR ATR with limited samples** [10609-98]
