SPIE

Volume 10637

Proceedings of SPIE 0277-786X, V. 10637

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Technology for Defense and Security XIV*, edited by Mark Dubinsky, Timothy C. Newell, Proceedings of SPIE Vol. 10637 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

FIBER LASERS: FIBER DEVELOPMENT AND CW POWER SCALING I

- 10637 02 **Progress on high-power Yb, Tm and Raman fiber lasers** [10637-1]
10637 03 **Advanced packaging and power scaling of narrow linewidth fiber amplifiers** [10637-2]

FIBER LASERS: FIBER DEVELOPMENT AND CW POWER SCALING II

- 10637 06 **New schemes and regimes of CW and pulsed Raman fiber lasers (Invited Paper)** [10637-5]
10637 08 **5W 1952nm Brillouin-free efficient single clad TDFA** [10637-7]

LASER DIODE SOURCE DEVELOPMENT I

- 10637 09 **Narrow-band and low SWaP diodes in tough environments** [10637-8]
10637 0A **Investigations of optical pumping for magnetometry using an auto-locking laser system**
[10637-9]
10637 0B **Band I DIRCM laser based on GaSb direct diode technology** [10637-10]
10637 0C **CCD-based thermoreflectance imaging of high-power diode lasers with back-irradiance**
[10637-11]

LASER DIODE SOURCE DEVELOPMENT II

- 10637 0G **Megawatt-class peak power laser diode pump sources** [10637-15]

FIBER LASERS: PULSED

- 10637 OH **Design trades for optimized second harmonic conversion efficiency of high-peak power Er:fiber source** [10637-16]
- 10637 OI **700- μ J, 100-ns, 20-kHz pulses from a 1.5-m Thulium-doped fiber amplifier** [10637-17]
- 10637 OJ **High-energy wavelength tunable dual-channel Tm:YLF laser** [10637-18]

LASER SYSTEMS, LASER MATERIALS, AND APPLICATIONS II

- 10637 OQ **InAs/AlSb type II superlattice avalanche photodiodes** [10637-25]

MID-IR LASERS AND LASER MATERIALS

- 10637 OU **Status of CdSiP₂ development for scaling mid-infrared laser power** [10637-29]
- 10637 OW **Performance evaluation of CO²⁺:CdTe as an optical gain medium** [10637-31]
- 10637 OZ **Dual-phase Er:Y₂O₃/MgO nanocomposites for mid-Infrared solid state lasers** [10637-34]

BULK SOLID STATE LASERS AND DPAL

- 10637 11 **High brightness, sub-nanosecond, and compact passively Q-switched laser with intracavity volume Bragg gratings** [10637-36]
- 10637 12 **Efficient 2-micron Ho lasers based on fluoride crystal hosts** [10637-37]

POSTER SESSION

- 10637 14 **Deep ultraviolet Raman spectroscopy for eyesafe standoff chemical threat detection** [10637-39]
- 10637 15 **Characterization of laser propagation over a long path through atmospheric turbulence** [10637-42]
