Volume 10641

Proceedings of SPIE 0277-786X, V. 10641

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Sensors and Systems for Space Applications XI*, edited by Khanh D. Pham, Genshe Chen, Proceedings of SPIE Vol. 10641 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 INSTRUMENT AND SENSOR ARCHITECTURE AND DESIGN FOR SPACE APPLICATIONS

10641 02 **Modelling of celestial backgrounds** [10641-1]

10641 03 **Compact midwave imaging system (CMIS) for weather satellite applications** [10641-2]

10641 04 **Multi-band optical photometry of geosynchronous satellites** [10641-3]

10641 05 **Research on camera on orbit radial calibration based on black body and infrared calibration stars** [10641-4]

10641 06 **Optical design of space cameras for automated rendezvous and docking systems** [10641-5]

SESSION 2 EMERGING SYSTEMS AND ARCHITECTURES FOR SPACE APPLICATIONS

10641 08 **DDDAS for space applications** [10641-7]

10641 09 **Investigation of the dynamic enhanced cubature Kalman filter** [10641-8]

10641 0A **Adaption from LWIR to visible wavebands of methods to describe the population of GEO belt debris** [10641-9]

10641 0B **Analysis of three-dimensionally proliferated sensor architectures for flexible SSA** [10641-10]

SESSION 3 PERCEPTION AND AUTONOMY FOR AEROSPACE APPLICATIONS

10641 0C **Markov logic network based complex event detection under uncertainty** [10641-11]

10641 0D **Multitask assessment of roads and vehicles network (MARVN)** [10641-12]

10641 0E **A robotic orbital emulator with lidar-based SLAM and AMCL for multiple entity pose estimation** [10641-13]

10641 0F **Using multiple IMUs in a stacked filter configuration for calibration and fine alignment** [10641-14]

10641 0G **Finding common ground by unifying autonomy indices to understand needed capabilities** [10641-15]

SESSION 4 EMERGING CONCEPTS FOR SPACE COMMUNICATIONS

10641 0H **An anti-jamming GPS receiver antenna testing system** [10641-16]

10641 0I **Link establishment criterion and topology optimization for hybrid GPS satellite communications with laser crosslinks** [10641-17]

10641 0J **Intelligent path loss prediction engine design using machine learning in the urban outdoor environment** [10641-18]

SESSION 5 OPTICAL DETECTION AND ANALYSIS FOR FREE SPACE LASER COMMUNICATIONS

10641 0K **Space qualification of InGaAs photodiodes and photoreceivers** [10641-19]

10641 0L **Sources of background light on space based laser communication links** [10641-20]

10641 0M **Quantum limited performance of optical receivers** [10641-21]

10641 0N **Predicting the performance of linear optical detectors in free space laser communication links** [10641-22]

10641 0O **The performance of Geiger mode avalanche photo-diodes in free space laser communication links** [10641-23]

SESSION 6 SPACE SENSORS AND MISSION OPTIONS I

10641 0P **Alignment of the Korsch type off-axis 3 mirror optical system using sensitivity table method** [10641-24]

10641 0Q **Low-cost, compact, and robust gas abundance sensor package** [10641-25]

SESSION 7 SPACE SENSORS AND MISSIONS OPTIONS II

10641 0R **Backside illuminated CMOS-TDI line scan sensor for space applications** [10641-26]

10641 0S **Think the way to measure the Earth Radiation Budget and the Total Solar Irradiance with a small satellites constellation** [10641-27]

10641 0T **Facility for orbital material processing** [10641-30]

10641 0U **A federated capability-based access control mechanism for Internet of Things (IoTs)** [10641-29]
