SPIE

Volume 10660

Proceedings of SPIE 0277-786X, V. 10660

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Information Science, Sensing, and Computation X*, edited by Eric Donkor, Michael Hayduk, Proceedings of SPIE Vol. 10660 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 QUANTUM COMPUTING, MEASUREMENTS AND ERROR CORRECTION

- 10660 02 **Simulated execution of hybrid quantum computing systems (Keynote Paper)** [10660-1]
10660 05 **Lasers pumped quantum dynamics in nanostructured arrays for computing** [10660-4]
10660 06 **Ultra-high spectral resolution spectrometer for single photon source characterization** [10660-5]

SESSION 2 QUANTUM CRYPTOGRAPHY AND QUANTUM KEY DISTRIBUTION

- 10660 08 **Mitigating pointing requirements and turbulence effects in free-space quantum key distribution**
[10660-7]
10660 09 **Practical security of semi-quantum key distribution** [10660-8]
10660 0A **Method for self-reconstruction of holograms for secure communication** [10660-9]
10660 0B **QKD from a microsatellite: the SOTA experience** [10660-10]
10660 0C **A Poisson model for entanglement optimization in the quantum internet** [10660-11]
10660 0D **Bell state optimizations for reliable quantum applications** [10660-12]

SESSION 3 QUANTUM INFORMATION SCIENCE I

- 10660 0F **Agency and the physics of numbers** [10660-14]
10660 0G **Majorana fermions and representations of the artin braid group** [10660-16]
10660 0H **Quantum information geometry in the space of measurements** [10660-17]

SESSION 4 QUANTUM INFORMATION SCIENCE II

10660 OI **Enhanced communication through quantum hyper-entanglement** [10660-18]

10660 OK **Storage and retrieval of optical information in levitated cavityless optomechanics** [10660-21]

SESSION 5 QUANTUM COMMUNICATION, AND QUANTUM NETWORKS

10660 OL **Towards using trapped ions as memory nodes in a photon-mediated quantum network**
[10660-23]

10660 OM **Higher dimensional quantum communication in a curved spacetime: an efficient simulation of the propagation of the wavefront of a photon** [10660-24]

10660 ON **Optimization and synchronization of programmable quantum communication channels**
[10660-26]
