**Volume 10666**

Proceedings of SPIE 0277-786X, V. 10666

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Three-Dimensional Imaging, Visualization, and Display 2018*, edited by Bahram Javidi, Jung-Young Son, Osamu Matoba, Manuel Martinez-Corral, Adrian Stern, Proceedings of SPIE Vol. 10666 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510618435

ISBN: 9781510618442 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Authors*  
ix *Conference Committee*

---

## **SESSION 1    3D IMAGING**

---

- 10666 02    **Design options for 360 degree viewable table-top digital color holographic displays (Invited Paper)** [10666-1]
- 10666 03    **Enhanced 3D performance by biconvex electrowetting lenticular lens structure (Invited Paper)** [10666-2]
- 10666 04    **3D TV based on integral photography (Invited Paper)** [10666-3]

---

## **SESSION 2    3D IMAGE ACQUISITION AND PROCESSING I**

---

- 10666 07    **Ray-space processing for omnidirectional FTV (Invited Paper)** [10666-6]
- 10666 08    **Compressive sensing with a block-strategy for fast image acquisitions** [10666-7]
- 10666 09    **Privacy-enabled displays** [10666-8]
- 10666 0A    **Computational reconstruction technique in integral imaging with enhanced visual quality** [10666-9]

---

## **SESSION 3    3D VISUALIZATION AND RELATED TECHNOLOGIES**

---

- 10666 0C    **Seeing the sound we hear: optical technologies for visualizing sound wave (Invited Paper)** [10666-11]
- 10666 0D    **Optical 3D visualization under inclement weather conditions (Invited Paper)** [10666-12]

---

## **SESSION 4    3D IMAGE ACQUISITION AND PROCESSING II**

---

- 10666 0G    **Depth and width reproducibility of integral photography from multi-view stereoscopic image (Invited Paper)** [10666-14]
- 10666 0H    **Plenoptic imaging techniques for improving accuracy and robustness of object tracking (Invited Paper)** [10666-15]

- 10666 0I      **Forming aerial 3D images with smooth motion parallax in combination of arc 3D display with AIRR (Invited Paper)** [10666-16]
- 10666 0J      **Virtual reality for crime scene visualization** [10666-17]

---

**SESSION 5      DIGITAL HOLOGRAPHY IN METROLOGY AND IMAGING**

---

- 10666 0K      **Digital holography under non paraxial conditions (Keynote Paper)** [10666-18]
- 10666 0L      **Random amplitude or phase modulation for three-dimensional sensing and imaging (Invited Paper)** [10666-19]
- 10666 0M      **Automated quantification of cardiomyocytes beating profile with time-lapse digital holographic microscopy (Invited Paper)** [10666-20]

---

**SESSION 6      HUMAN FACTOR**

---

- 10666 0P      **Monocular depth sense in a light field display (Invited Paper)** [10666-23]
- 10666 0Q      **Microstereopsis is good, but orthostereopsis is better: precision alignment task performance and viewer discomfort with a stereoscopic 3D display** [10666-24]

---

**SESSION 7      3D IMAGE AND RELATED TECHNOLOGY I**

---

- 10666 0S      **Augmented reality integration of fused LiDAR and spatial mapping** [10666-26]
- 10666 0U      **Characterizing three dimensional open cell structures without segmentation** [10666-28]

---

**SESSION 8      3D IMAGE AND RELATED TECHNOLOGY II**

---

- 10666 0W      **3D reconstructions from spectral light fields (Invited Paper)** [10666-30]
- 10666 0Y      **High-resolution spatial image display with multiple UHD projectors** [10666-33]
- 10666 0Z      **3D integral microscopy based in far-field detection** [10666-34]
- 10666 10      **Matching-based depth camera and mirrors for 3D reconstruction (Invited Paper)** [10666-35]

**POSTER SESSION**

---

- 10666 11 **Methods of voxel data rendering for visualizing on multi-layer volumetric displays** [10666-36]
- 10666 13 **Three-dimensional object visualization and detection in low light illumination using integral imaging: an overview** [10666-38]
- 10666 14 **Depth estimation of computational reconstruction in integral imaging by considering the pixel blink rate** [10666-39]
- 10666 15 **3D resolution enhancement of integral imaging using resolution priority integral imaging and depth priority integral imaging** [10666-40]
- 10666 16 **Depth resolution enhancement of computational reconstruction of integral imaging** [10666-41]
- 10666 17 **Digital holographic sound imaging for frequency estimation of piezoelectric vibrator** [10666-42]
- 10666 18 **An overview of flexible sensing integral imaging for three-dimensional profilometric reconstruction with occlusion removal** [10666-43]
