

PROCEEDINGS OF SPIE

Semiconductor Lasers and Laser Dynamics VIII

**Krassimir Panajotov
Marc Sciamanna
Rainer Michalzik**
Editors

**23–26 April 2018
Strasbourg, France**

Sponsored by
SPIE

Cosponsored by
Strasbourg the Eurooptimist (France)
CNRS (France)
Investissements d'Avenir (France)
iCube (France)
Université de Strasbourg (France)

Cooperating Organisations
Photonics 21 (Germany)
EOS—European Optical Society (Germany)
Photonics Public Private Partnership (Belgium)
Comité National d'Optique et de Photonique (France)

Volume 10682

Proceedings of SPIE 0277-786X, V. 10682

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Semiconductor Lasers and Laser Dynamics VIII*, edited by Krassimir Panajotov, Marc Sciamanna, Rainer Michalzik, Proceedings of SPIE Vol. 10682 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

VCSELS

- 10682 04 **Optical wireless power transmission using VCSELS (Invited Paper)** [10682-3]
10682 05 **Spin lasers for optical data communication** [10682-4]

QUANTUM DOT LASERS AND AMPLIFIERS

- 10682 0C **Non-Adler excitable interplay between lasing quantum dot states** [10682-11]

LASER NONLINEAR DYNAMICS I

- 10682 0H **Theory of delay-coupled nonidentical quantum cascade lasers** [10682-16]
10682 0J **Thermal characterisation of quantum cascade lasers with Fabry Perot modes** [10682-18]

MODE-LOCKED LASERS AND FREQUENCY COMBS

- 10682 0M **Monolithic symmetric multiple colliding pulse mode-locked laser by using on-chip reflectors** [10682-21]
10682 0N **Mode-locked diode laser with resonant ring amplifier** [10682-22]

NANOLASERS

- 10682 0O **Lasing from ZnO nanorods on ITO-coated substrates** [10682-27]
10682 0Q **Threshold dynamics in meso- and nanoscale lasers: why Vertical Cavity Surface Emitting Lasers? (Invited Paper)** [10682-29]

ON-SI INTEGRATION

10682 0U **Hybrid integration of GaInAsP LD on silicon platform by epitaxial growth using directly bonded InP/Si substrate (Invited Paper)** [10682-24]

LASER NONLINEAR DYNAMICS II

10682 0X **Active-MMI laser diode toward high-speed direct modulation based on multiple photon-photon resonance (Invited Paper)** [10682-32]

10682 0Y **Recent advances in InAs/GaAs quantum dot lasers with short optical feedback (Invited Paper)** [10682-33]

10682 0Z **Injection locking of two laterally-coupled semiconductor laser arrays** [10682-34]

10682 10 **Beyond the relaxation frequency limit in square-wave dynamics** [10682-35]

NOVEL CONCEPTS II

10682 14 **Optically quantum-well-pumped semiconductor disk lasers for single- and dual-wavelength emission** [10682-39]

PHOTONIC CRYSTAL LASERS/VCSELS

10682 18 **Optical manipulation of current confinement in VCSELS with an external laser beam (Best Student Paper Award)** [10682-43]

10682 19 **Thermally-induced birefringence in VCSELS: approaching the limits** [10682-44]

NOVEL CONCEPTS III

10682 1D **Theoretical study of polarization dynamics in VCSEL-based optical frequency combs** [10682-48]

SPATIOTEMPORAL AND FEEDBACK-INDUCED DYNAMICS

10682 1F **Spatiotemporal extreme events in spatially extended lasers (Invited Paper)** [10682-50]

10682 1I **Feedback-induced discretisation of the relaxation oscillation frequency in a semiconductor laser** [10682-53]

POSTER SESSION

- 10682 1K **Study of a single emitter laser diode: Pspice model and characterization system** [10682-55]
- 10682 1O **Temperature dependence of external differential quantum efficiency of GaN-based blue laser diode** [10682-59]
- 10682 1P **Design and characterization of a laser integrated with long on-chip optical feedback usable as compact random number generator** [10682-60]
- 10682 1Q **Suppressed time delay signature in chaotic nanolasers with hybrid feedback** [10682-61]
- 10682 1R **Equivalent circuit modeling of the dynamic operation of ultra-high speed multi-mode VCSELs** [10682-62]
- 10682 1S **IFVD-based large intermixing selectivity window process for high power laser diodes** [10682-63]
- 10682 1T **De-embedding device parasitics of ultra-high speed VCSELs** [10682-64]
- 10682 1U **Validation of quasi-normal modes and of constant-flux modes for computing fundamental resonances of VCSELs** [10682-65]
- 10682 1V **Modeling of a semiconductor laser coupled to an external fiberoptic ring resonator** [10682-66]
- 10682 1Y **Numerical modeling of mode-locking stability and repetition rate transitions in monolithic multi-section semiconductor lasers** [10682-69]
- 10682 1Z **Timing stability and repetition rate frequency tuning analysis of a passively mode-locked quantum-well semiconductor laser subject to dual-cavity optical self-feedback** [10682-70]
- 10682 22 **Optical feedback stabilization of a frequency comb generated by a self-mode-locked quantum dot laser emitting at 1255 nm** [10682-73]
- 10682 23 **RF line width and integrated RIN study of a single-section quantum dot comb laser** [10682-74]
- 10682 24 **Nonlinear characteristics of semiconductor laser subject to optical incoherent feedback** [10682-75]
- 10682 25 **Dynamical characteristics of semiconductor laser under both optical and optoelectronic feedback** [10682-76]
- 10682 26 **Theoretical study of mode-locked lasers with nonlinear loop mirrors** [10682-77]
- 10682 28 **Development of InP-based multichannel transmitters for application in WDM access systems** [10682-79]

- 10682 2B **Facet temperature reduction by separate pumped window in high power laser diodes**
[10682-82]
- 10682 2C **300mm focal length optical system design for direct high power laser diodes stack** [10682-83]
- 10682 2D **Frequency modulated external cavity laser with photonic crystal resonator and microheater**
[10682-84]
