Volume 10687

Proceedings of SPIE 0277-786X, V. 10687

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Electronics and Photonics: Fundamentals and Devices*, edited by Sebastian Reineke, Koen Vandewal, Proceedings of SPIE Vol. 10687 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

ORGANIC PHOTOVOLTAICS AND PHOTODETECTORS I

10687 0A **Morphology in dip-coated blend films for photovoltaics studied by UV/VIS absorption and fluorescence spectroscopy** [10687-9]

ORGANIC PHOTOVOLTAICS AND PHOTODETECTORS III

10687 0I **Strategies for high current densities in non-fullerene acceptors based organic solar cells (Invited Paper)** [10687-17]

ORGANIC LIGHT-EMITTING DEVICES I

10687 0Q **Flexible and highly segmented OLED for automotive applications** [10687-24]

ORGANIC LIGHT-EMITTING DEVICES II

10687 0U **Effect of matrix anisotropy on the apparent emitter orientation in organic LED** [10687-28]

ORGANIC LIGHT-EMITTING DEVICES III

10687 0Z **Improved light outcoupling of organic light-emitting diodes by combined optimization of thin layers and external textures** [10687-33]

10687 10 **Optimizing the outcoupling efficiency and the radiation pattern of organic light emitting devices by inkjet printing lens arrays films** [10687-34]

POSTER SESSION

10687 14 **Optical and amplified spontaneous emission of neat films containing 2-cyanoacetic derivatives** [10687-38]

- 10687 15 **Solution-processable green phosphorescent iridium(III) complexes bearing 3,3,3-triphenylpropionic acid fragment for use in OLEDs** [10687-39]
- 10687 17 **Investigation of photoluminescence and amplified spontaneous emission properties of cyanoacetic acid derivative (KTB) in PVK amorphous thin films** [10687-41]
- 10687 18 **3,3'-Bicarbazole structural derivatives as charge transporting materials for use in OLED devices** [10687-42]
- 10687 1A **Whispering gallery mode assisted random lasing in dye-doped PVA coated silica microsphere** [10687-44]
- 10687 1D **Energy level determination of purine containing blue light emitting organic compounds** [10687-47]
- 10687 1I **Enhanced color conversion efficiency of remote phosphor-converted light-emitting diodes using micro-concavity arrays** [10687-52]
