

PROCEEDINGS OF SPIE

Quantum Photonic Devices 2018

Cesare Soci
Mario Agio
Kartik Srinivasan
Editors

19–20 August 2018
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 10733

Proceedings of SPIE 0277-786X, V. 10733

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Photonic Devices 2018*, edited by Cesare Soci, Mario Agio, Kartik Srinivasan, Proceedings of SPIE Vol. 10733 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SOLID-STATE EMITTERS I: COLOR CENTERS IN DIAMOND

10733 04	Color centres in diamond from single photon sources to ODMR in cells (Invited Paper) [10733-3]
10733 06	Efficient, uniform, and large-volume microwave magnetic coupling to NV centers in diamond using dielectric resonator antennas [10733-5]

SINGLE PHOTON SOURCES AND DETECTORS

10733 0G	Are on-chip heralded single photon sources possible by intermodal four wave mixing in silicon waveguides? [10733-14]
10733 0H	Polarization tuning for high-fidelity fiber-coupled single photon sources [10733-15]
10733 0K	Tunable interferometers on a flexible polymer chip [10733-18]

QUANTUM CRYPTOGRAPHY AND COMPUTING DEVICES

10733 0T	Signature of multi-photon interference in boson sampling experiments [10733-27]
10733 0U	Experimental demonstration of Gaussian distributed quantum random number generator [10733-28]
