

PROCEEDINGS OF SPIE

Organic Light Emitting Materials and Devices XXII

Chihaya Adachi
Jang-Joo Kim
Franky So
Editors

19–21 August 2018
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 10736

Proceedings of SPIE 0277-786X, V. 10736

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Light Emitting Materials and Devices XXII*, edited by Chihaya Adachi, Jang-Joo Kim, Franky So, Proceedings of SPIE Vol. 10736 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

OLED MATERIALS I

10736 05	The facile synthesis of 1,8-Dibromo-9-heterofluorenes [10736-3]
----------	--

DEVICES AND PROCESSING III

10736 10	Multiscale study of the effects of the solvent treatment of conductive PSS:PEDOT polymer [10736-34]
----------	--

PEROVSKITES II

10736 1F	Efficient light-emitting diodes based on in-situ self-assembled Perovskite nanocrystals [10736-49]
----------	---

10736 1G	High color gamut of perovskite QDs/PMMA-based white light-emitting diode [10736-50]
----------	--

POSTER SESSION

10736 1L	Development of AMOLED hole transport layer based on thiophene with carbazole [10736-55]
----------	--

10736 1M	Lifetime extension for organic light emitting diodes [10736-56]
----------	--

10736 1T	Coherent perfect absorption in one-port devices with wedged organic thin-film absorbers [10736-63]
----------	---

10736 20	Solution processable piperazine and triphenyl moiety containing non-symmetric bis-styryl-DWK type molecular glasses with light-emitting and amplified spontaneous emission properties [10736-71]
----------	---

10736 2B	OLEDs fabricated by solution process based on a novel linear poly(arylene oxindole) [10736-82]
----------	---

10736 2G	Atomistic simulations of mechanical and thermophysical properties of OLED materials [10736-87]
----------	---
