**Volume 10744**

Proceedings of SPIE 0277-786X, V. 10744

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Beam Shaping XVIII*, edited by Angela Dudley, Alexander V. Laskin, Proceedings of SPIE Vol. 10744 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510620599

ISBN: 9781510620605 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Authors*  
ix *Conference Committee*

---

## **SESSION 1      ANGULAR MOMENTUM, SINGULAR OPTICS, AND VORTEX BEAMS**

---

- 10744 03      **Symmetry, topology, and dark-ray optics (Invited Paper)** [10744-2]  
10744 04      **Engineering the intensity trajectory and phase gradient of light beams** [10744-3]

---

## **SESSION 2      QUANTUM OPTICS, VECTOR BEAMS, AND POLARIZATION**

---

- 10744 06      **Generation of multiple vector beams using a single hologram** [10744-5]  
10744 07      **Extending the use of commercial Q-plates for the generation of high-order and hybrid vector beams** [10744-6]  
10744 08      **Generation of curvilinear inhomogeneous polarization beams** [10744-7]  
10744 09      **Pancharatnam excursions of higher-order C-points** [10744-8]

---

## **SESSION 3      HOLOGRAM FABRICATION AND DIGITAL HOLOGRAPHY I**

---

- 10744 0A      **2.5-dimensional polymer-based holograms with individually adjustable structure angle**  
[10744-9]  
10744 0B      **High precision ultrashort pulsed laser drilling of thin metal foils by means of multibeam  
processing** [10744-10]  
10744 0C      **Direct hologram recording on metal surface** [10744-11]  
10744 0D      **Beam shaping in "light pen" holographic originating system** [10744-12]  
10744 0F      **Optical vortex dynamics as a method to examine spatial light modulator correction** [10744-38]

---

**SESSION 4 HOLOGRAM FABRICATION AND DIGITAL HOLOGRAPHY II**

---

- 10744 OG **GPC and Holo-GPC for laser beam shaping in 2D and 3D (Invited Paper)** [10744-14]
- 10744 OJ **Dynamic holography for speckle noise reduction in hybrid measurement system** [10744-17]
- 10744 OK **Design of diffractive optical elements for controllable axial long depth of focus** [10744-36]

---

**SESSION 5 HIGHER-ORDER MODES AND MODE MEASUREMENT**

---

- 10744 OL **Compact diffractive optics for high-resolution sorting of orbital angular momentum beams (Invited Paper)** [10744-18]
- 10744 OM **Multi-plane light conversion of high spatial mode count (Invited Paper)** [10744-19]
- 10744 ON **Excitation of higher-order modes in optofluidic hollow-core photonic crystal fiber** [10744-20]

---

**SESSION 6 ACOUSTO-OPTICS AND DEFORMABLE MIRRORS**

---

- 10744 OQ **Acousto-optic transfer functions as applied to S laser beam shaping (Invited Paper)** [10744-22]
- 10744 OR **High-resolution bimorph deformable mirror for laser beam shaping (Invited Paper)** [10744-23]
- 10744 OS **LC phase modulator vs. deformable mirror for laser beam shaping: What is better?** [10744-24]

---

**SESSION 7 HIGH-POWER AND MATERIAL PROCESSING**

---

- 10744 OU **High-power femtosecond laser cutting and drilling combining beam-shaping and beam-splitting** [10744-26]
- 10744 OV **High power wide band square-wave pulse generation at 1  $\mu\text{m}$  in a passively mode-locked fiber laser** [10744-27]
- 10744 OX **High power laser beam shaping for welding applications by means of diffractive elements** [10744-29]

**POSTER SESSION**

---

- 10744 11     **Generation of propagation invariant vector flat-top beams** [10744-33]
- 10744 12     **Talbot effect analysis for periodic inhomogeneous polarization gratings** [10744-34]
- 10744 13     **Spatial coherence properties of digitally generated partially coherent vortex beams** [10744-35]
- 10744 14     **Free-space communication with spatial modes of light** [10744-39]
