

PROCEEDINGS OF SPIE

Remote Sensing and Modeling of the Atmosphere, Oceans, and Interactions VII

Guosheng Liu
Ziad S. Haddad
Editors

25–26 September 2018
Honolulu, Hawaii, United States

Sponsored by
SPIE

Cosponsored by
NASA—National Aeronautics and Space Administration (United States)
RADI—Institute of Remote Sensing and Digital Earth, Chinese Academy of Sciences (China)
State Key Laboratory of Remote Sensing Science, Chinese Academy of Sciences (China)
Ministry of Earth Sciences (India)

Cooperating Organizations
University of Hawai'i at Mānoa (United States) • JAXA—Japan Aerospace Exploration Agency (Japan)
NICT—National Institute of Information and Communications Technology (Japan) • ISRO—Indian Space
Research Organization (India) • ESSO—Earth System Science Organization (India)

Volume 10782

Proceedings of SPIE 0277-786X, V. 10782

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing and Modeling of the Atmosphere, Oceans, and Interactions VII*, edited by Guosheng Liu, Ziad S. Haddad, Proceedings of SPIE Vol. 10782 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Authors*
- vii *Symposium Committees*
- ix *Conference Committee*

SESSION 1 UNDERSTANDING ATMOSPHERIC PROCESSES

- 10782 02 **Temporal and spatial evaluation of long-term satellite-based precipitation products across the complex topographical and climatic gradients of Chile** [10782-27]
- 10782 03 **Interpreting millimeter-wave radiances over convective clouds** [10782-3]
- 10782 04 **The challenges of representing vertical motion in numerical models** [10782-4]

SESSION 2 STUDIES ON MONSOON AND HURRICANES

- 10782 06 **Association between upper level diffluence in the Tropical Easterly Jet and the formation of the strongest Atlantic hurricanes in recent years** [10782-6]
- 10782 08 **A low-wavenumber analysis of the relative roles of the environmental and vortex-scale variables responsible for rapid intensity changes in landfalling tropical cyclones** [10782-8]
- 10782 0A **Constraining the models' response of tropical clouds to SST forcings using CALIPSO observations** [10782-10]

SESSION 4 UNDERSTANDING ATMOSPHERIC RADIATIVE PROPERTIES

- 10782 0G **Comparison and research of group refractivity models and atmospheric delay to lidar** [10782-17]
- 10782 0H **Drop size distribution observed by dual-frequency precipitation radar onboard global precipitation measurement core satellite** [10782-23]

10782 OJ **Effects of turbulence on the transmission of partially coherent vortex beams in the ocean environment** [10782-19]

10782 OK **Deriving the slant visibility using the Klett method and the visualization of the slant visibility at the airport** [10782-20]

POSTER SESSION

10782 OM **Aerosol impacts on the atmospheric circulation field over Asia** [10782-22]

10782 ON **Comparisons of radiative transfer models for GMI assimilation in WRF** [10782-24]
