Volume 10787

Proceedings of SPIE 0277-786X, V. 10787

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Environmental Effects on Light Propagation and Adaptive Systems*, edited by Karin U. Stein, Szymon Gladysz, Proceedings of SPIE Vol. 10787 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 CHARACTERIZATION OF THE ATMOSPHERE

- 10787 03 **Optical turbulence in the coastal area over False Bay, South Africa: comparison of measurements and modeling results** [10787-2]
- 10787 05 **Height dependence of characteristics of power spectra of temperature investigated in the surface layer of White Sands, US** [10787-4]
- 10787 06 **Investigation of optical turbulence from an unmanned aerial system** [10787-5]
- 10787 07 **A comparative study of the equatorial spread-F occurrence between post-sunset and post-midnight during minimum solar activity (Best Student Paper Award)** [10787-6]
- 10787 08 **Visualization of the wind drift of turbulent inhomogeneities** [10787-32]

SESSION 2 ADAPTIVE OPTICS I

- 10787 09 **Adaptive optics correction of scintillation for oceanic turbulence-affected laser beams (Invited Paper)** [10787-7]
- 10787 0B **Experimental demonstration of the diffuse Fourier holography wavefront sensing** [10787-9]
- 10787 0C **Speckle-based sequential optimization of adaptive receivers in downlink laser communications** [10787-10]
- 10787 0D **Wavefront sensor with hologram filters in the problem of measuring phase distortions of laser radiation** [10787-11]
- 10787 0E **Computer correction of turbulent distortions of incoherent optical images using multi-aperture systems** [10787-33]

SESSION 3 BEAM PROPAGATION THROUGH THE ATMOSPHERE

- 10787 0F **Analysis of optical fading in phase-OTDR distributed acoustic sensing systems: the effects of fading in threat detection** [10787-13]

- 10787 OG **Modelling studies of transmission and scattering of high energy laser radiation under remote continental conditions** [10787-14]
- 10787 OH **Angle dependent stray light measurements of high-power laser radiation in natural atmospheric environments** [10787-15]
- 10787 OI **Object identification in images acquired through underwater turbulent media** [10787-16]
- 10787 OJ **Quadratic approximation Bessel Gaussian beams propagation through non-Kolmogorov and marine atmosphere** [10787-17]

SESSION 4 ADAPTIVE OPTICS II

- 10787 OL **Design and characterization of a vibrating piezo-membrane deformable mirror for adaptive optics application** [10787-12]
- 10787 OM **Generation of vortex and partially coherent laser beams based on fiber array coherent combining** [10787-31]

SESSION 5 LASER COMMUNICATION

- 10787 ON **Average intensity and spreading of cylindrical vector vortex beams in turbulent atmosphere** [10787-18]
- 10787 OP **Propagation of the non-paraxial Gaussian beam through the inhomogeneous atmosphere** [10787-20]
- 10787 OQ **Investigation of optical vortex propagation in the artificial atmospheric path** [10787-21]

SESSION 6 ADVANCED FREE-SPACE OPTICAL COMMUNICATION TECHNIQUES AND APPLICATIONS

- 10787 OR **Estimation of Mie scattering influence for the FSO channel under artificially simulated fog conditions** [10787-22]
- 10787 OS **Laboratory demonstration of optimizing optical single sideband scheme to increase spectral efficiency in optical geostationary satellite feeder links** [10787-23]
- 10787 OU **An additional velocity loop in the CCD and MEMS accelerometer-based lightweight optoelectronic system control** [10787-25]

POSTER SESSION

- 10787 OW **High volume manufacturing of optical MEMS devices using biomass nano-patterning materials and ecofriendly developable lithography processes** [10787-27]

10787 0X **Internal structure of metal material with gas permeability function related to MEMS devices**
[10787-28]

10787 0Y **Utilization of gas permeable metal plate for the purpose of reduction of transfer defect in MEMS electronic device** [10787-29]
