Volume 10790

Proceedings of SPIE 0277-786X, V. 10790

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Earth Resources and Environmental Remote Sensing/GIS Applications IX*, edited by Ulrich Michel, Karsten Schulz, Proceedings of SPIE Vol. 10790 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 MACHINE LEARNING FOR REMOTE SENSING

10790 02	Machine learning methods for remote sensing applications: an overview (Invited Paper) [10790-1]
10790 03	Evaluation of CNNs for land cover classification in high-resolution airborne images [10790-2]

SESSION 2 PRESERVATION OF CULTURAL AND NATURAL HERITAGE I

10790 06	GIS and remote sensing based method to extract fluvial terraces for archaeological purposes [10790-6]
10790 08	The innovative documentation of cultural heritage using H-BIM: case study of Asinou church [10790-8]
10790 09	Monitoring cultural heritage sites affected by geohazards [10790-9]
10790 0A	Tunable broadband monolithic inertial sensors for real-time monitoring and characterization of sites and structures [10790-10]
10790 0B	Digitization issues in documenting cultural heritage with drones: case study of Foinikas, Cyprus [10790-13]

SESSION 3 PRESERVATION OF CULTURAL AND NATURAL HERITAGE II

10790 0D	HERACLES: EU-backed multi-national project on cultural heritage preservation [10790-11]
10790 0E	Using SAR and optical data from Sentinel satellites for precise modeling of seasonal floating reed islands dynamics in Srebarna Lake [10790-14]

SESSION 4 HAZARD MITIGATION I

- 10790 0F **Comparison of terrestrial laser scanning and structure-from-motion photogrammetry for steep slope mapping** [10790-15]
- 10790 0G **A synergy of radar and optical data of Copernicus programme for landslide mapping** [10790-16]
- 10790 0H **Extraction of landslides in the 2016 Kumamoto earthquake using multi-temporal Lidar data** [10790-17]
- 10790 0I **The automatic detection of landslide features from LiDAR DEM using modifying contour connection method** [10790-18]
- 10790 0J **A comprehensive land cover classification approach for the development of wildfire fuels layers** [10790-46]

SESSION 5 ENVIRONMENTAL MONITORING I

- 10790 0K **Real-time texturing and visualization of a 2.5D terrain model from live LiDAR and RGB data streaming in a remote sensing workflow** [10790-19]
- 10790 0L **Reconnaissance of coastal areas using simulated EnMAP data in an ERDAS IMAGINE environment** [10790-20]
- 10790 0M **A case study on the detection of illegal dumps with GIS and remote sensing images** [10790-21]
- 10790 0N **Direct or indirect on-shore hydrocarbon detection methods applied to hyperspectral data in tropical area** [10790-22]
- 10790 0O **Time series evaluation of re-urbanization in disaster area of large-scale tsunami in Japan by high-resolution satellite remote sensing** [10790-23]

SESSION 6 ENVIRONMENTAL MONITORING II

- 10790 0R **GIS-based integration of spatial and remote sensing data for wildfire monitoring (Best Student Paper Award)** [10790-25]
- 10790 0T **Potential of Sentinel-2 data in the detection of lithium (Li)-bearing pegmatites: a study case** [10790-47]
- 10790 0W **Remote sensing and GIS for assessment and prediction of environmental hazards due to mine waste: case study from Daitari iron ore mines, Odisha, India** [10790-29]

SESSION 7 ENVIRONMENTAL MONITORING III

- 10790 0X **Surface irradiance estimations on watercourses with remote sensing data** [10790-30]
- 10790 0Y **Evaluation of MODIS NDVI based phenology indicators for the analysis of vegetation dynamics in the nature reserve Königsbrücker Heide** [10790-32]

SESSION 8 INFRASTRUCTURES AND URBAN AREAS

- 10790 10 **Assessment of electrical and infrastructure recovery in Puerto Rico following hurricane Maria using a multisource time series of satellite imagery** [10790-33]
- 10790 11 **Change detection in sequences of SAR sub-aperture images** [10790-42]
- 10790 12 **Brazilian frontier governance: survey of infrastructure based on remote sensing techniques** [10790-48]

SESSION 9 HAZARD MITIGATION II

- 10790 14 **Investigation of atmospheric anomalies recorded for moderate or strong earthquakes by geospatial and field data** [10790-38]
- 10790 15 **Automated burned area identification in real-time during wildfire events using WorldView imagery for the insurance industry** [10790-45]

SESSION 10 SENSORS AND PLATFORMS

- 10790 17 **Remote sensing in the visible to the mid-wave infrared spectral range for mapping of grasslands and assessment of grass biomass** [10790-34]

SESSION 11 HAZARD MITIGATION III

- 10790 1B **Theoretical approach to estimate the probability of strata convergence: implications for mining induced fractures and potential health risk** [10790-39]
- 10790 1D **Landslide susceptibility mapping at Dodangeh watershed, Iran using LR and ANN models in GIS** [10790-41]

POSTER SESSION

- 10790 1G **Long-term satellite image time series for the assesment of land use/cover change in the Brazilian Amazon rainforest** [10790-50]
- 10790 1I **Detection of ditch structures in the region of "Altes Land" by means of current optical satellite data** [10790-53]
- 10790 1K **Modification in landscape horizontal structure, induced by changing environmental conditions: a case study of Haskovo region (Southeastern Bulgaria)** [10790-55]
- 10790 1L **Pegmatite spectral behavior considering ASTER and Landsat 8 OLI data in Naipa and Muiane mines (Alto Ligonha, Mozambique)** [10790-56]
- 10790 1N **Information potential of the 3D GIS application with the use of virtual technologies** [10790-58]
- 10790 1O **Temporal generalization of an artificial neural networks for land use/land cover classification** [10790-59]
- 10790 1P **Combining field and image spectral reflectance for mangrove species identification and mapping using WorldView-2 image** [10790-60]
- 10790 1R **Modeling of forest ecosystems recovery after fire based on orthogonalization of multispectral satellite data** [10790-62]
- 10790 1S **Effects of sample size on burned areas accuracy estimates in the Amazon Basin** [10790-63]
- 10790 1T **Impact of extreme climate events and anthropogenic stressors on urban green albedo assessed from time-series MODIS satellite data** [10790-64]
- 10790 1U **Application of remote sensing data for forest fires severity assessment** [10790-65]
- 10790 1W **Experimental study on segmentation methods in road recognition** [10790-69]
- 10790 1Y **Scenario simulation of Harbin urban expansion and its spatial pattern evaluation with GIS/RS** [10790-71]
