Volume 10791

Proceedings of SPIE 0277-786X, V. 10791

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Lidar Technologies, Techniques, and Measurements for Atmospheric Remote Sensing XIV*, edited by Upendra N. Singh, Georgios D. Tzeremes, Proceedings of SPIE Vol. 10791 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 GREENHOUSE GAS MEASUREMENTS

- 10791 03 **All-fibered coherent-differential absorption lidar at 1.645 μm for simultaneous methane and wind-speed measurements** [10791-2]
- 10791 04 **Development of the marine Raman lidar system** [10791-3]
- 10791 05 **Experimental estimation of the efficiency of trace gas sounding in the mid-IR by the OPO lidar system** [10791-4]

SESSION 2 PLANETARY AND EARTH LIDAR OBSERVATIONS

- 10791 06 **Development of a Mars lidar (MARLI) for measuring wind and aerosol profiles from orbit (Invited Paper)** [10791-5]
- 10791 07 **A continuously tunable NIR laser and its applications in material classification** [10791-6]
- 10791 09 **Lidar system for measurement of vertical profiles of ozone in the upper troposphere-stratosphere** [10791-8]
- 10791 0A **On optimization of optical parameters of biaxial monostatic CW lidar for atmospheric sensing in the daytime** [10791-9]

SESSION 3 AEROSOLS AND RAMAN LIDARS

- 10791 0B **A novel lidar system for CH₄ and VOC's detection of fugitive emissions and environmental monitoring (Invited Paper)** [10791-10]
- 10791 0C **Distribution estimation of radioactivity concentration by compact polarization lidar in Fukushima** [10791-12]
- 10791 0D **Sensitivity of micro-lidar with SiPM to sky backgrounds** [10791-13]
- 10791 0E **A pressure-tuned field-widened Michelson interferometer system as the spectroscopic filter of high-spectral-resolution lidar** [10791-14]

POSTER SESSION

- 10791 0G **Lidar sensing atmosphere by gigawatt femtosecond laser pulses in the continent-ocean transition zone** [10791-16]
- 10791 0I **Simulation of the remote atmospheric sounding by OPO lidar system in the near- and mid-IR** [10791-18]
- 10791 0J **Low-level signal processing technique for the wind lidar** [10791-19]
- 10791 0K **Generating condition of non-diffractive beam under annular beam propagation in random media (Best Student Paper Award)** [10791-20]
