Volume 10794

Proceedings of SPIE 0277-786X, V. 10794

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Target and Background Signatures IV*, edited by Karin U. Stein, Ric Schleijpen, Proceedings of SPIE Vol. 10794 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 CHARACTERISTICS OF VEGETATION

10794 03 **Detectability in the SWIR spectral range** [10794-2]

10794 04 **Collecting information for spectral boundaries determination** [10794-3]

10794 05 **NATO hyperspectral measurement of natural background** [10794-4]

10794 06 **Copernicus Sentinel opportunities using field spectroscopy to support deep man-made infrastructures in Cyprus** [10794-5]

SESSION 2 ENVIRONMENTAL EFFECTS ON SIGNATURES

10794 07 **Visualizing simulated temperatures of a complex object calculated with FTOM using open source software (BLENDER)** [10794-6]

10794 08 **Evolution of the statistical fluctuations in the measured temperature differences between painted metal plates of a CUBI infrared calibration target** [10794-7]

10794 0A **Sensitivity of input parameters to modelling of atmospheric transmission of long-wave infrared radiation at sea under warm and humid conditions** [10794-9]

10794 0B **A field-based method for evaluating thermal properties of static and mobile camouflage** [10794-10]

SESSION 3 OBSERVER EFFECTS AND TRIALS

10794 0C **Methods for measuring time to detect in human observer trials (Invited Paper)** [10794-11]

10794 0E **Evaluation of validity of observer test for testing of camouflage patterns** [10794-13]

10794 0F **Glass detection and recognition based on the fusion of ultrasonic sensor and RGB-D sensor for the visually impaired** [10794-14]

10794 0G **Novel infrared object detection and tracking algorithm based on visual attention** [10794-15]

SESSION 4 TARGET DETECTION TECHNIQUES

10794 0H **Camouflage evaluation by bio-inspired local conspicuity quantification (Invited Paper)** [10794-16]

10794 0J **Evaluation of side-scan sonar performance for the detection of naval mines** [10794-18]

10794 0K **Feature extraction using high-range resolution profiles for estimating the number of targets** [10794-19]

10794 0L **Nanosat-based detection and tracking of launch vehicles** [10794-20]

SESSION 5 MACHINE LEARNING

10794 0M **Supporting artificial intelligence with artificial images (Invited Paper)** [10794-21]

10794 0N **Detection technology of foreign matter on the ocean for MDA with hyperspectral imaging** [10794-22]

SESSION 6 SCENES AND DETECTION PERFORMANCE

10794 0P **Improved EO/IR target and background scene simulation with MuSES using a rapid fluid flow solver (Invited Paper)** [10794-25]

10794 0Q **Semi synthetic naval scene generation with engagement simulation for infrared-guided missile threat analysis** [10794-26]

10794 0R **The IR modeling and simulation of the orbit target with celestial background** [10794-28]

10794 0S **Scene text detection and recognition system for visually impaired people in real world (Best Student Paper)** [10794-29]

10794 0T **Sea-land segmentation in SAR images based on multifeature fused boundary clustering** [10794-30]

SESSION 7 HARDWARE AND MATERIALS

10794 0U **Optical polarization and the dependence of angle of incidence for different surfaces: comparison between different wavelengths from UV to IR (Invited Paper)** [10794-31]

10794 0V **Multispectral gonioreflectometer facility for directional reflectance measurements and its use on materials and paints** [10794-32]

10794 0W **Adaptive camouflage panel in the visible spectral range** [10794-33]

POSTER SESSION

10794 0X **Water spray infrared extinction calculation and experimental validation** [10794-36]

10794 0Y **Autoencoder versus pre-trained CNN networks: deep-features applied to accelerate computationally expensive object detection in real-time video streams** [10794-35]

10794 0Z **New developments in thermal targets** [10794-34]
