Volume 10798

Proceedings of SPIE 0277-786X, V. 10798

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers: Technology and Systems, Platforms, and Effects II*, edited by Harro Ackermann, Willy L. Bohn, David H. Titterton, Proceedings of SPIE Vol. 10798 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 LASER ARCHITECTURES FOR POWER SCALING AND PLATFORMS

10798 02	Test facility for high-energy laser (TuV-HEL) (Invited Paper) [10798-1]
10798 03	New defence system using a chemical oxygen-iodine laser in a high-altitude airship [10798-2]

SESSION 2 DIODE-PUMPED AKALI LASERS AND OPTICALLY PUMPED RARE GAS LASERS

10798 07	Lasing degradation effects in diode-pumped alkali lasers (Invited Paper) [10798-6]
10798 08	Parametric study of static and flowing-gas Cs DPAL (Best Student Paper) [10798-7]

SESSION 3 FIBER LASER AND BEAM COMBING

10798 0A	Analysis of partially coherent combining of 2D arrays of laser beams [10798-10]
----------	--

SESSION 4 LASER INTERACTION, EFFECTS, AND COMPONENTS

10798 0F	Experimental study on effects of dual-pulse length laser on metal [10798-15]
----------	---

POSTER SESSION

10798 0H	Coherent laser combining in all-fiber feedback format [10798-11]
10798 0I	Analysis and experimental research on liquid cooling slab laser [10798-4]
