Volume 10822

Proceedings of SPIE 0277-786X, V. 10822

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Photonic Measurements, Data Management, and Processing III*, edited by Ming Li, Bahram Jalali, Keisuke Goda, Kevin K. Tsia, Proceedings of SPIE Vol. 10822 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

SIGNAL PROCESSING AND MICROWAVE FREQUENCY MEASUREMENTS BASED ON PHOTONICS

10822 02	Multiple-dimensional photonic measurements based on mapping technology (Invited Paper) [10822-1]
10822 03	A photonic system for broadband microwave measurement (Invited Paper) [10822-2]

REAL-TIME PHOTONIC MEASUREMENTS

10822 0A	A real-time multichannel distributed acoustic sensing system with phase-sensitive optical domain reflectometry technology [10822-9]
----------	---

PHOTONICS-ASSISTED MICROWAVE MEASUREMENT SYSTEMS AND OPTICAL IMAGING

10822 0C	Dual-band LFM CW radar based on a photonic-assisted de-chirp processing receiver [10822-11]
10822 0D	A scanning near-field optical microscope applied to commercial environmental scanning electron microscopes [10822-12]

HIGH-QUALITY SIGNAL GENERATION AND OTHERS

10822 0F	Photonic enabled RF self-interference cancellation for full-duplex communication (Invited Paper) [10822-14]
10822 0G	High-quality microwave generation and frequency up-conversion by photonic integrated two-section DFB lasers [10822-15]
10822 0H	Optical frequency comb generator based on interference among parallel phase modulators [10822-16]

- 10822 OJ Particle classification based on polarized light scattering and machine learning [10822-19]
- 10822 OK A tunable self-mixing laser based on frequency electro-optical modulation [10822-20]

POSTER SESSION

- 10822 OL A real-time continuous auto-focus algorithm for stereo microscope cameras [10822-21]
- 10822 OO A Ka-band ultra-wideband microwave photonic imaging radar demonstrator [10822-24]
- 10822 OQ A simulation method for dual-comb spectroscopy with jitter noise [10822-26]
- 10822 OS Sagnac interferometer with polarization maintaining fiber for vector transversal loading measurement [10822-28]
- 10822 OU A fast human action recognition algorithm based on key frame pinning [10822-30]
- 10822 OV A super-resolution reconstruction algorithm of infrared pedestrian images via compressed sensing [10822-31]
- 10822 OW Optical modulation format recognition for polarization-multiplexed coherent system using Chinese restaurant process [10822-32]
