PROCEEDINGS OF SPIE

Optoelectronic Imaging and Multimedia Technology V

Qionghai Dai
Tsutomu Shimura
Editors

11–12 October 2018
Beijing, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations
Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • Shanghai Institute of Optics and Fine Mechanics (China) • Changchun Institute of Optics and Fine Mechanics (China) • Institute of Semiconductors (China) • Institute of Optics and Electronics (China) • Institute of Physics (China) • Shanghai Institute of Technical Physics (China) • China Instrument and Control Society (China) • Optoelectronics Technology Committee, COS (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Korea, Republic of) • The Australian Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Supporting Organizations
CAST—China Association for Science and Technology (China)
NSFC—National Nature Science Foundation (China)

Volume 10817

Proceedings of SPIE 0277-786X, V. 10817

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optoelectronic Imaging and Multimedia Technology V*, edited by Qionghai Dai, Tsutomu Shimura, Proceedings of SPIE Vol. 10817 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

ix *Symposium Committees*

xiii *Conference Committee*

SESSION 1 VIRTUAL REALITY AND 3D DISPLAY

10817 03 **Fast stereo matching using image pyramid for lunar rover** [10817-7]

10817 04 **Tunable liquid lens equipped virtual reality adapter for scientific, medical, and therapeutic goals** [10817-8]

10817 05 **Depth-aware interactive display method for vision-tangible mixed reality** [10817-9]

SESSION 2 DEPTH AND LIGHT FIELD

10817 06 **Innovative hole-filling method for depth-image-based rendering (DIBR) based on context learning (Invited Paper)** [10817-1]

10817 07 **Curvature feature extraction based ICP points cloud registration method** [10817-3]

10817 08 **Influence of textures on the robustness of the depth estimation algorithm for light field** [10817-4]

SESSION 3 COMPUTATIONAL ACQUISITION AND ANALYSIS I

10817 09 **Superresolution imaging through scattering media by spectrum correlation (Invited Paper)** [10817-10]

10817 0A **Monocular vision avoidance method based on fully convolutional networks** [10817-12]

10817 0B **A denoising method of medical ultrasound image based on guided image filtering and fractional derivative** [10817-13]

10817 0C **Programmable compressed sensing using simple deterministic sensing matrices** [10817-14]

10817 0D **Infrared and visible light image registration algorithm based on clustering and mutual information** [10817-15]

SESSION 4 COMPUTATIONAL ACQUISITION AND ANALYSIS II

10817 0E **Novel 3D mesh quality assessment method based on curvature analysis (Invited Paper)** [10817-16]

10817 0F **Color characterization for displays based on color appearance matching** [10817-17]

10817 0G **Moving target detection based on edge optical flow from satellite videos** [10817-18]

10817 0H **Transform coefficients distribution of the future versatile video coding (VVC) standard** [10817-19]

SESSION 5 COMPUTATIONAL OPTICS

10817 0J **The new-type silicon photomultiplier for ToF LiDAR and other pulse detecting applications** [10817-21]

10817 0L **Optimization algorithms for wavefront sensorless adaptive optics** [10817-23]

POSTER SESSION

10817 0M **Self-augmented deep generative network for blind image deblurring** [10817-11]

10817 0N **Color clustering for ocean surface over Chinese surrounding sea areas based on octree color quantization** [10817-24]

10817 0R **Iterative optimization procedure based design of phase masks suitable for computational depth of field extension** [10817-28]

10817 0S **A super-resolution imaging system based on sub-pixel camera shifting** [10817-29]

10817 0T **An optical flow network for enhancing the edge information** [10817-30]

10817 0U **Image super-resolution reconstruction based on residual dictionary learning by support vector regression** [10817-31]

10817 0V **A scale adaptive tracker based on point feature** [10817-32]

10817 0X **A structural decomposition-based method for restoring images corrupted by impulse noise** [10817-34]

10817 0Y **Free-view walkthrough for the light field display** [10817-35]

10817 0Z **High-efficiency generating of photorealistic super-multiview image for glasses-free three-dimensional display based on distributed rendering** [10817-36]

10817 10 **The enhancement of depth estimation based on multi-scale convolution kernels** [10817-37]

10817 13 **A parallel matching algorithm for archaeological fragment object designs based on Hausdorff distance** [10817-40]

10817 15 **Effects of rescaling bilinear interpolant on image interpolation quality** [10817-42]

10817 16 **Luminance regionalization-based saliency detection for high dynamic range image** [10817-43]

10817 17 **New quality assessment method for dense light fields** [10817-44]

10817 18 **Comparison of restoration methods for turbulence-degraded images** [10817-45]

10817 19 **High-level semantic information extraction of remote-sensing images based on deep-learning image classification** [10817-46]

10817 1A **Streak tube imaging system based on compressive sensing** [10817-47]

10817 1C **A novel adaptive Gaussian-weighted mean filter for removal of high-density salt-and-pepper noise from images** [10817-49]

10817 1D **No-reference video quality assessment based on perceptual features extracted from multi-directional video spatiotemporal slices images** [10817-50]

10817 1E **Aliasing artefact index for image interpolation quality assessment** [10817-51]

10817 1F **Extrapolation for image interpolation** [10817-52]

10817 1G **Remote sensing image classification method based on active-learning deep neural network** [10817-53]

10817 1H **Spectrum restoration methods of a polarimetric-spectro imager based on light field architecture** [10817-54]

10817 1I **The properties of opaque CsI photocathode** [10817-55]
