

PROCEEDINGS OF SPIE

Holography, Diffractive Optics, and Applications VIII

**Yunlong Sheng
Chongxiu Yu
Changhe Zhou**
Editors

**11–13 October 2018
Beijing, China**

Sponsored by
SPIE
COS—Chinese Optical Society

Volume 10818

Proceedings of SPIE 0277-786X, V. 10818

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Holography, Diffractive Optics, and Applications VIII*, edited by Yunlong Sheng, Chongxiu Yu, Changhe Zhou, Proceedings of SPIE Vol. 10818 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committees</i>
xiii	<i>Conference Committee</i>

SESSION 1 DIGITAL HOLOGRAPHY

10818 02	Discovery of temporal universe (Invited Paper) [10818-1]
10818 03	Fast calculation of CGH using improved symmetric compressed LUT algorithm (Invited Paper) [10818-2]
10818 04	Image based wavefront sensorless adaptive optics in Fresnel incoherent correlation digital holography [10818-3]

SESSION 2 METAMATERIAL HOLOGRAMS

10818 0A	Single-particle detection using high-refractive index film coated in microring resonator [10818-9]
10818 0B	Broadband and high-efficiency half-waveplate based on dielectric metasurfaces [10818-10]

SESSION 3 COMPUTATIONAL IMAGING

10818 0E	Three-dimensional human face identification card [10818-14]
----------	--

SESSION 4 DIFFRACTIVE GRATINGS I

10818 0G	Gratings theory for pico-optics applications (Invited Paper) [10818-18]
10818 0H	Three-dimensional measurement module of transverse odd-even combinational Dammann grating [10818-19]
10818 0J	Method for measuring the spatial characteristics of high-resolution diffraction gratings [10818-21]

SESSION 5 3D DISPLAY AND METROLOGY

- 10818 OK **A directional backlight covered with pixelated nano-grating arrays** [10818-22]
- 10818 OL **Dynamic 3D projection display system using printed holographic display plate** [10818-23]
- 10818 OM **An experimental study on the contribution of different colors to binocular matching in 3D displays** [10818-24]
- 10818 ON **Three-dimensional measurement method of structured light based on three measuring triangles** [10818-25]
- 10818 OO **High-precision 3D measurement of large-sized rough glass using phase-shifting and phase-height mapping** [10818-26]
- 10818 OP **Transparent computer generated Fourier holograms for optical display and sighting system** [10818-27]

SESSION 6 WAVEFRONT ENGINEERING I

- 10818 OR **Holographic sound propagation imaging (Invited Paper)** [10818-88]
- 10818 OS **Communication with quantum limited subspace (Invited Paper)** [10818-31]
- 10818 OT **Anisotropic geometric optical transformation based cylindrical vector beams multiplexing communication** [10818-32]
- 10818 OU **Measuring the orbital angular momentum of light by dynamic polygon apertures** [10818-34]
- 10818 OV **Orthogonal crossed gratings fabricated by scanning Dammann lithography** [10818-35]

SESSION 7 WAVEFRONT ENGINEERING II

- 10818 OX **Comparative study of holographic, interferometric, and other tools for vortex beam analysis (Invited Paper)** [10818-33]
- 10818 OZ **Phase-only LCOS modulator as a correcting element in digital holographic interferometers** [10818-40]

SESSION 8 DIFFRACTIVE GRATINGS II

- 10818 10 **Fabrication and measurement of gold reflective grating** [10818-41]
- 10818 11 **Wide-band two-port polarization-independent beam splitter based on an encapsulated transmission grating** [10818-42]

- 10818 12 **Four-port beam splitter of a single-groove grating** [10818-43]
- 10818 13 **Measurement of micro-angle based on the Talbot effect of 2D grating** [10818-44]
- 10818 14 **Optimization of test gratings and their measurement at manufacturing of diffractive optics and conformal correctors** [10818-49]

SESSION 9 DIFFRACTIVE GRATINGS III

- 10818 15 **Direct laser writing lithography technology based on rotating two-dimensional Dammann grating** [10818-45]
- 10818 16 **Quantum analysis on the Talbot effect of two-dimensional grating** [10818-46]
- 10818 17 **Sagnac polarized imaging resolved with two high-density gratings** [10818-47]

POSTER SESSION

- 10818 19 **Mass production of computer-generated Fourier holograms and its application to prevent counterfeiting** [10818-29]
- 10818 1A **Development of the methods of holographic optics for wavefront control in photonic systems** [10818-39]
- 10818 1B **Investigation of structured head diffraction gratings for linear optical encoder** [10818-50]
- 10818 1C **Automated optoelectronic system for diagnostics of optical variable devices** [10818-51]
- 10818 1D **Generation of speckle vortices by double Archimedes' spiral micro-holes array** [10818-52]
- 10818 1G **Holographic model on the mechanism of memory encoding, storage, and retrieval in the brain** [10818-55]
- 10818 1I **Evolution of phase singularities for a laser beam propagating through an inhomogeneous turbulent atmosphere** [10818-57]
- 10818 1J **Optical element surface defect measurement with lensless digital holographic microscopy** [10818-58]
- 10818 1K **Single assignment based nearest neighbor interpolation algorithm for digital holographic diffraction tomography** [10818-59]
- 10818 1L **Design of polarization-insensitive transmission gratings for optical communication** [10818-60]
- 10818 1N **Fast calculation of computer generated hologram using multi-core CPUs and GPU system** [10818-62]

- 10818 1O **Grating interferometry with high optical subdivision** [10818-63]
- 10818 1P **Dielectric cavity enhanced high reflective multiband waveplate** [10818-64]
- 10818 1Q **Precision focus plane searching in digital holography using axial adjacent amplitude similarity** [10818-65]
- 10818 1R **Talbot effect in the focal field of a lens** [10818-66]
- 10818 1S **New high-performance opto-electronic scanner for authentication** [10818-67]
- 10818 1U **Optimized design of double-plate full-color holographic waveguide display** [10818-69]
- 10818 1V **Optimal unequal phase steps for laser direct writing in DPE manufacturing** [10818-70]
- 10818 1W **Analysis of holographic lightguide's optical parameters for AR devices** [10818-71]
- 10818 1X **Design and fabrication of a variable-line-space grating surface for a Fresnel-grating lens based miniature spectrometer** [10818-72]
- 10818 1Y **Research of two-wavelength filter based on guided-mode resonance of two-dimensional gradient-period grating** [10818-73]
- 10818 1Z **The forming mechanism of microstructure of crossed holographic photoresist grating** [10818-74]
- 10818 20 **Coherent optical phase recovery method based on boundary condition** [10818-75]
- 10818 21 **Resolution characteristics in scanning digital holography with sub-pixel shifting reconstruction imaging** [10818-76]
- 10818 22 **Voxel-based algorithm for calculating 3D computer generated hologram with occlusion effect** [10818-77]
- 10818 23 **A combination of computer generated Fresnel holograms and light guide substrate with diffractive optical elements for optical display and sighting system** [10818-78]
- 10818 26 **Implementation of off-axis digital holography using a single diffraction grating** [10818-81]
- 10818 28 **A random dot stereoacuity test for different colors in 3D displays** [10818-83]
- 10818 29 **High-precision 3D shape measurement based on time-resolved VCSEL** [10818-84]
- 10818 2A **Fabrication of double-periodic graded photonic crystal array** [10818-85]
- 10818 2B **Improvement on the different scene depth of effective perspective images' segmentation and mosaicking based holographic hologram** [10818-86]
