

PROCEEDINGS OF SPIE

Quantum and Nonlinear Optics V

Qihuang Gong
Guang-Can Guo
Byoung S. Ham
Editors

11–13 October 2018
Beijing, China

Sponsored by

SPIE

COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • Shanghai Institute of Optics and Fine Mechanics (China) • Changchun Institute of Optics and Fine Mechanics (China) • Institute of Semiconductors (China) • Institute of Optics and Electronics (China) • Institute of Physics (China) • Shanghai Institute of Technical Physics (China) • China Instrument and Control Society (China) • Optoelectronics Technology Committee, COS (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Korea, Republic of) • The Australian Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Supporting Organizations

Volume 10825

Proceedings of SPIE 0277-786X, V. 10825

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum and Nonlinear Optics V*, edited by Qihuang Gong, Guang-Can Guo, Byoung S. Ham, Proceedings of SPIE Vol. 10825 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

QUANTUM MEASUREMENT AND QUANTUM COMPUTATION

10825 0B	Precision patterning sub-nanometrology relied up pico-meter quantum sensing approach [10825-9]
----------	--

MATTER-LIGHT CORRELATIONS AND COHERENCE I

10825 0D	Steering of entangled photon states with nonlinear metamaterials [10825-11]
10825 0F	Nonclassicality and entanglement for continuous-variable quantum information (Invited Paper) [10825-13]

POSTER SESSION

10825 10	Interference effect in the photodetachment of silver anions by short femtosecond laser field [10825-34]
10825 11	Numerical simulation and experimental studies on soliton self-frequency shift in single-mode optical fiber [10825-35]
10825 12	Optical frequency comb generation with widely and precisely frequency space [10825-36]
10825 13	Ultra-high group index slow light with optical buffering performance in photonic crystal waveguide coupled with cavity [10825-37]
10825 14	Influence of atomic densities on propagation property for femtosecond Gaussian pulse in a three-level Λ-type atomic medium [10825-38]
10825 15	The ultra-stable microwave based on ultra-stable laser with robustness and long term stability [10825-39]
10825 16	Dual-wavelength eye-safe optical parametric oscillator intracavity driven by a coaxially end pumped laser [10825-40]

- 10825 17 **Propagation of ultrashort dichromatic solitons in a cascade three-level system** [10825-41]
- 10825 18 **Coherence automatic adjustment of the optical pulses inside mode-lock fiber laser cavity** [10825-42]
- 10825 19 **New generation regimes in mode-locked fibre lasers with controllable radiation intensity distribution along the cavity** [10825-43]
- 10825 1B **Analysis of underwater target detection based on entangled Fock state interference** [10825-45]
- 10825 1D **Localization in a synthetic photonic lattice with varying coupling ratio** [10825-47]
- 10825 1E **Analysis of the CW single frequency laser radiation from UV to near-IR generated by intra-cavity second harmonic generation of the resonant wave in singly resonant optical parametric oscillator under collimated Gaussian beam approximation** [10825-48]
- 10825 1F **A monolithic readout circuit for high-frequency sine wave gating single-photon detection** [10825-49]
- 10825 1I **Study of coherence effects in an inverted Y-type four-level system** [10825-52]
