PROCEEDINGS OF SPIE

Ocean Optics and Information Technology

Xuelong Li
Lixin Wu
Jianquan Yao
Hao Yin
Renhe Zhang
Zhongliang Zhu
Editors

22–24 May 2018
Beijing, China

Organized by
Chinese Society for Optical Engineering (CSOE) (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Photoelectronic Industrialization Committee, CHIA (China)
Department of Cooperation and Coordination for Industry, Academe and Research, CHIA (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)

Sponsored by
Division of Information and Electronic Engineering of Chinese Academy of Engineering (China)
Chinese Society for Optical Engineering (CSOE) (China)

SPIE

Volume 10850

Proceedings of SPIE 0277-786X, V. 10850

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Ocean Optics and Information Technology*, edited by Xuelong Li, Lixin Wu, Jianquan Yao, Hao Yin, Renhe Zhang, Zhongliang Zhu, Proceedings of SPIE Vol. 10850 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xi *Introduction*

OCEAN OPTICS AND INFORMATION TECHNOLOGY

10850 02 **Construction and application of ocean big data platform based on UAV system** [10850-1]

10850 03 **Comparing approaches of suppressing tow ship noise with a horizontal line array** [10850-3]

10850 04 **Research on the high-precision acoustic autonomous navigation technique of UUV based on sound ray revision** [10850-4]

10850 05 **Test method of 1553b bus based on real airborne environment** [10850-6]

10850 06 **Investigation of laser impulse broadening of breaking wave by the Monte Carlo method** [10850-7]

10850 07 **Research on Mach-Zehnder interference sensors based on the fused tapered optical fiber technology** [10850-10]

10850 08 **Research of nitrate concentration prediction based on GA** [10850-11]

10850 09 **Development of automated observation radiometer for water-leaving radiance** [10850-12]

10850 0A **Micro quasi-Michelson interferometric fiber optics hydrophone based on refractive index modulation** [10850-13]

10850 0B **Variations in the optical backscattering properties of phytoplankton of different cell sizes** [10850-14]

10850 0C **Analysis of submarine optical cable eavesdropping defense means** [10850-15]

10850 0D **3D information extraction algorithm of underwater target based on spatial mapping** [10850-16]

10850 0E **Research and development of applications of the theory of polarization aberration** [10850-17]

10850 0F **Underwater 3D reconstruction based on multi-view stereo** [10850-18]

10850 0G **Underwater target recognition algorithm under the influence of non-uniform illumination** [10850-19]

10850 0H **Simultaneous retrieval of aerosol optical thickness and exponent of Junge power-law from AATSR L1B** [10850-21]

10850 0I **The mobile sensor nodes scheduling algorithm based on grid competition in UWSNs** [10850-22]

10850 0J **Evaluation method of Coastal Zone Imager performance based on remote sensing data analysis** [10850-24]

10850 0K **Marine local communication technology based on solar-blind ultraviolet** [10850-26]

10850 0M **A low frequency denoising algorithm of optical fiber laser hydrophone based on wavelet transformation** [10850-30]

10850 0N **An underwater binocular vision positioning method based on back-propagation neural networks** [10850-31]

10850 0O **Field experimental studies of detecting the dissolved CO_2/HCO^-_3 using Raman spectroscopy** [10850-32]

10850 0P **Spatial variation of CDOM and its influencing factors in tropical East Indian Ocean during summer** [10850-33]

10850 0Q **Experimental study on underwater range-gated imaging system pulse and gate control coordination strategy** [10850-34]

10850 0R **Comparison experiment of sun glint correction method for nearshore high-resolution multispectral satellite images** [10850-36]

10850 0S **An approach for sensing underwater particles using digital holographic imaging** [10850-37]

10850 0T **Monte Carlo simulation of radiative transfer in polarized spherically coupled ocean-atmosphere system** [10850-41]

10850 0U **Simulations and measurements of polarization states changing in underwater laser transmission** [10850-42]

10850 0V **Miniaturized in situ dark-field microscope for in situ detecting plankton** [10850-43]

10850 0W **Marine plankton microscope system based on light field camera** [10850-44]

10850 0X **Remote sensing inversion of total suspended matter concentration in Oujiang River based on Landsat-8/OLI** [10850-45]

10850 0Y **Spectral characteristics of *Sargassum horneri* in seawater** [10850-46]

10850 0Z **The deep-sea lamp design based on the light attenuation in water** [10850-47]

10850 10 **Underwater 3D imaging by a structured light system** [10850-50]

10850 11 **The research on Modulation Transfer Function of underwater imaging system based on edge method** [10850-51]
