Volume 10857

Proceedings of SPIE, 1605-7422, V. 10857

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Lasers in Dentistry XXV*, edited by Peter Rechmann, Daniel Fried, Proceedings of SPIE Vol. 10857 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

ISSN: 1605-7422
ISSN: 2410-9045 (electronic)

ISBN: 9781510623569

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 EARLY CARIES DETECTION: NIR AND OCT

10857 02 **Longitudinal caries detection and monitoring with near infrared transillumination (Invited Paper)** [10857-1]

SESSION 2 3D PRINT AND CAD/CAM: OCT SOFT TISSUE

10857 06 **Intraoral scanner and stereographic 3D print in orthodontics** [10857-5]

10857 07 **Method to approximate intra oral scanner noise and resolution** [10857-6]

SESSION 3 MICROBIAL PLAQUE PH: EARLY CARIES DETECTION NIR AND OCT: CARIES PREVENTION

10857 0C **Confocal Raman microscopy and non linear microscopy to study human enamel incipient lesions** [10857-11]

10857 0D **The relationship of dehydration rate and transparent surface layer thickness for coronal lesions on extracted teeth** [10857-12]

SESSION 4 DEEP AND MACHINE LEARNING: NIR/OCT: IMPLANTS AND COFFEE EROSION

10857 0H **Deep learning-based quantitative analysis of dental caries using optical coherence tomography: an ex vivo study** [10857-16]

10857 0I **Near-infrared endoscopic imaging of deep artificial approximal lesions in extracted teeth** [10857-17]

10857 0J **Ultra-short pulsed laser manufacturing of yttria stabilized alumina-toughened zirconia dental implants** [10857-18]

10857 0K **Spectroscopic examination of enamel and dentin indicates erosion and staining by coffee through sequestration of elements** [10857-19]

POSTER SESSION

- 10857 OL **An appliance for monitoring the shrinkage of root caries with OCT** [10857-20]
- 10857 OM **Selective removal of dental calculus with a diode-pumped Er:YAG laser** [10857-21]
- 10857 ON **Image guided laser ablation of demineralization from root surfaces** [10857-22]
- 10857 OO **The contrast of demineralization on tooth occlusal surfaces from 405 to 1950-nm with varying depth** [10857-23]
