Volume 10866

Proceedings of SPIE, 1605-7422, V. 10866

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optogenetics and Optical Manipulation 2019*, edited by Samarendra K. Mohanty, E. Duco Jansen, Proceedings of SPIE Vol. 10866 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

FUNCTIONAL IMAGING I

- 10866 03 **A bimodal bioluminescent Ca²⁺ indicator toward spatiotemporally scalable imaging (Invited Paper)** [10866-1]
- 10866 05 **Optimized large-scale optogenetic interface for non-human primates** [10866-3]

FUNCTIONAL IMAGING II

- 10866 09 **Optogenetic control of cytokinesis shows that polarized trafficking governs the process** [10866-7]

ADVANCED STIMULATION I

- 10866 0E **Infrared block of Na⁺ and Ca²⁺ spikes in in crayfish neuromuscular junction** [10866-12]

ADVANCED STIMULATION II

- 10866 0K **In vivo holographic photo-stimulation and two photon GCaMP6 imaging of vagus nerve axons using a GRIN lens integrated nerve cuff** [10866-28]
