Volume 10891

Proceedings of SPIE, 1605-7422, V. 10891

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nanoscale Imaging, Sensing, and Actuation for Biomedical Applications XVI*, edited by Dan V. Nicolau, Dror Fixler, Ewa M. Goldys, Proceedings of SPIE Vol. 10891 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

| | |
|-----|----------------------|
| v | Authors |
| vii | Conference Committee |

NANOSCALE IMAGING I

| | |
|----------|---|
| 10891 05 | An optical method to detect tissue scattering: theory, experiments and biomedical applications [10891-3] |
| 10891 07 | Plasma dispersion effect based super-resolved imaging in silicon [10891-5] |
| 10891 0A | Nanoscale imaging of biological samples with responsivity corrected Atomic Force Microscopy-Infrared (AFM-IR) spectroscopy [10891-51] |
| 10891 0B | Carbon dots-based fluorescent sensor for nanoscale sensing [10891-54] |

APPLICATION OF NANOSTRUCTURED SENSORS AND NANOSPECTROSCOPY

| | |
|----------|---|
| 10891 0G | Advanced microknot devices [10891-13] |
| 10891 0J | Diagnostic possibilities of dynamic light scattering technique [10891-16] |
| 10891 0K | A comparison of simulated and fabricated gold bowtie nanoantennas for molecular fingerprinting [10891-17] |
| 10891 0M | Simulation and design of plasmonic gold bowtie nanoantennas [10891-19] |

NANOSCALE IMAGING II

| | |
|----------|--|
| 10891 0O | Development of local surface plasmon resonance sensor using gold nanoparticles [10891-21] |
| 10891 0R | Design of sophisticated shaped, multilayered, and multifunctional nanoparticles for combined in-vivo imaging and advanced drug delivery [10891-24] |
| 10891 0S | Upconversion nanoparticles assisted multi-photon fluorescence saturation microscopy [10891-25] |
| 10891 0V | Enhanced entangled-photon-pair interaction with metallic nanoparticles [10891-28] |

MULTIFUNCTIONAL NANOPARTICLES (IMAGING AND SENSING)

- 10891 0W Multi-wavelength imaging of tissue phantoms by optical feedback interferometry (Invited Paper) [10891-30]
- 10891 0Z Frequency domain analysis of time-resolved fluorescence measurements using the squared distance approach [10891-33]
- 10891 12 Porous silicon sensors: From on-chip to mobile diagnostics (Invited Paper) [10891-31]
- 10891 13 Highly stable conjugated polymer dots as multifunctional agents for photoacoustic imaging-guided photothermal therapy [10891-32]

POSTER SESSION

- 10891 17 Metal- based nanoparticles as carriers of mTHPC drug for effective photodynamic therapy [10891-40]
- 10891 18 Do the iso-path-length points differ among semi-infinite, concave-cylindrical and convex-cylindrical geometries? [10891-41]
- 10891 1A The scattering of gold nanorods in identification of macrophages [10891-43]
- 10891 1B Full Stokes temporal imaging [10891-45]
- 10891 1C Multiple plane phase retrieval from temporal lens array [10891-46]
- 10891 1D Calibration iso-pathlength point in cylindrical tissue geometry: comparing steady state photon diffusion to Monte Carlo simulation [10891-47]
- 10891 1E Cellular internalization pathways of glucose-functionalized gold nanoparticles [10891-48]
- 10891 1H Insulin-coated gold nanoparticles as an effective approach for bypassing the blood-brain barrier [10891-52]
- 10891 1I High-order modes micro-knot excited by a long-period fiber grating [10891-53]
- 10891 1J Fluorescence depolarization studies of heteroatom-doped CDs [10891-7]
