

PROCEEDINGS OF SPIE

XXII International Symposium on High Power Laser Systems and Applications

Paolo Di Lazzaro
Editor

9–12 October 2018
Frascati, Italy

Organized by
ENEA, Italian National Agency for New Technologies, Energy and Sustainable Economic
Development (Italy)

Sponsored by
ENEA, Italian National Agency for New Technologies, Energy and Sustainable Economic
Development (Italy)
El.En. SpA (Italy)

Supported by
European Physical Society

Published by
SPIE

Volume 11042

Proceedings of SPIE 0277-786X, V. 11042

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *XXII International Symposium on High Power Laser Systems and Applications*, edited by Paolo Di Lazzaro, Proceedings of SPIE Vol. 11042 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

GAS AND CHEMICAL LASERS

11042 02	Optically pumped rare gas lasers (Invited Paper) [11042-30]
11042 03	High power laser activities at Kawasaki Heavy Industries, Ltd. (Invited Paper) [11042-38]
11042 04	Super-broadband hybrid mid-infrared laser systems [11042-14]
11042 05	Transverse optical pumping of e-beam excited high-pressure He/Ar mixture with a laser diode array [11042-16]
11042 06	Lasing in optically pumped Ar:He mixture excited in a dielectric barrier discharge [11042-6]
11042 07	Improvement of line selected hydrogen fluoride laser output efficiency by cascade effect [11042-34]
11042 08	Energy-pooling processes of high-lying Xe atoms under the condition of ultrahigh pumped power [11042-27]
11042 09	High power laser from $\text{OH} + \text{D}_2 \rightarrow \text{HOD}(\mathbf{v}_{\text{HO}}', \mathbf{v}_{\text{HOD}}', \mathbf{v}_{\text{OD}}'), \mathbf{J}') + \text{D}$ reaction [11042-4]
11042 0A	Output characteristics comparison for cw OIL with different pumping types [11042-1]
11042 0B	Computer simulation of electric energy distribution of CO gas mixture [11042-5]

ALKALI LASERS

11042 0C	Effects of rare gas collision partner and pump energy on the four-level Cs exciplex pumped alkali laser [11042-12]
11042 0D	Continuous wave diode pumped flowing-gas Cesium laser [11042-3]

- 11042 0E Theoretical study of unstable resonators for diode-pumped alkali laser using wave optics simulation [11042-25]
- 11042 0F Parametric study of the performance and beam quality of cesium DPAL: experiment and modelling [11042-11]
- 11042 0G Study on broadening of Na D₁ and D₂ lines spectra in sodium-argon mixture [11042-21]

SOLID STATE LASERS

- 11042 0H Picosecond deep ultraviolet pulses generated by a 100 kHz thin-disk laser system [11042-13]
- 11042 0I High energy 1342 nm electro-optically cavity-dumped laser and picosecond regenerative amplifier [11042-15]
- 11042 0J A blue random laser based on solid waveguide gain films with plasmonics and scatters [11042-26]
- 11042 0K Principle of influence of static and dynamic intracavity gratings on spectral properties of high-power all-solid-**state laser's radiation** [11042-45]

RAMAN LASERS

- 11042 0L The study of optical frequency-comb laser generated by stimulated Raman scattering [11042-40]
- 11042 0M Raman lasers for trace gas detection [11042-41]

MODULATING LASER PULSES

- 11042 0N High pressure CO₂ amplifiers for picosecond pulse amplification (Invited Paper) [11042-28]
- 11042 0O Alignment tolerances of self-imaging configurations for passive coherent beam combining [11042-22]
- 11042 0P Hybrid THL-100 laser system: results and prospect [11042-8]
- 11042 0Q Slippage effects on FEL saturated power in short pulse SASE devices [11042-31]

LASER-MATTER INTERACTION

- 11042 0R Laser induced breakdown spectroscopy for in situ multielemental analysis during additive manufacturing process [11042-20]
- 11042 0S High energy excimer laser system for nanosecond annealing of semiconductor devices [11042-36]
- 11042 0T A single-shot near edge x-ray absorption fine structure spectroscopy using double stream gas puff target source [11042-33]
- 11042 0U Interaction of high power laser pulses with ensemble of solid particles [11042-47]
- 11042 0V Observation of inner surface laser-induced periodic surface structures in a microhole produced in a glass optical fiber by varying femtosecond laser pulse number and energy [11042-37]

LASER PLASMAS

- 11042 0W Optical pumped ultra-short pulse CO₂ lasers as drivers of laser-plasma accelerators and other applications (Invited Paper) [11042-46]
- 11042 0X Target current: an appropriate parameter for characterizing the dynamics of laser-matter interaction [11042-7]
- 11042 0Y Compact radiation sources based on laser-driven plasma waves [11042-48]
- 11042 0Z The ENEA discharge produced plasma extreme ultraviolet source and its patterning applications [11042-42]

SPACE APPLICATIONS AND REMOTE SENSING

- 11042 10 Radiation hardness assurance: innovative aspects and challenges [11042-32]
- 11042 11 Nuclear powered spaceborne laser for orbital debris removal [11042-39]
- 11042 12 Laser radars for marine monitoring [11042-29]

LIGHTING AND CULTURAL HERITAGE

- 11042 13 Lighting a smart society (Invited Paper) [11042-23]
- 11042 14 Influence of ultraviolet radiation on the color of blood stains embedded in the archaeological textile known as the Shroud of Turin [11042-24]
