

PROCEEDINGS OF SPIE

Third International Conference on Photonics and Optical Engineering

Ailing Tian

Editor

5–8 December 2018

Xi'an, China

Organized by

Xi'an Institute of Optics and Precision Mechanics (China)

Xi'an Technological University, State Key Laboratory of Transient Optics and Photonics (China)

Cooperating Organizations

SPIE

Nanyang Technological University (Singapore)

Centre for Optical and Laser Engineering (Singapore)

Xi'an Jiaotong University (China)

Acta Photonica Sinica (China)

Sponsored by

Chinese Optical Society (China)

Shaanxi Optical Society (China)

Optics and Photonics Society of Singapore (Singapore)

High-speed Photography and Photonics Committee of Chinese Optical Society (China)

Published by

SPIE

Volume 11052

Proceedings of SPIE 0277-786X, V. 11052

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on Photonics and Optical Engineering*, edited by Ailing Tian, Proceedings of SPIE Vol. 11052 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
xi *Conference Committee*

SESSION 1 THIRD INTERNATIONAL CONFERENCE ON PHOTONICS AND OPTICAL ENGINEERING

- 11052 02 **Detection method for the dynamic signal in light screen array based on constant false alarm rate** [11052-4]
- 11052 03 **Based on embedded ARM board advanced high-speed galvanometer control system** [11052-5]
- 11052 04 **Structure design and analysis of the secondary mirror bracket for all day star orientation instrument** [11052-6]
- 11052 05 **Imaging human skin morphology with polarization parameters indirect microscopic method** [11052-7]
- 11052 06 **InP photoconductive semiconductor switches generated ultra-short electrical pulse** [11052-19]
- 11052 07 **Modeling and analysis of image rotation for the AIMS solar optical telescope** [11052-20]
- 11052 08 **Study on spectral characteristics of polarization maintaining fiber Bragg grating under lateral pressure** [11052-21]
- 11052 09 **Time delay retrieval via the slope of spatial-spectral interference fringe for short pulses** [11052-22]
- 11052 0A **Transport-of-intensity equation (TIE) based phase imaging in a confocal laser scanning microscope** [11052-23]
- 11052 0B **Multimodality endoscopic imaging technology for visualization of layered architecture and vasculature** [11052-26]
- 11052 0C **Optical system design for wide-angle airborne mapping camera with diffractive optical element** [11052-27]
- 11052 0D **A high integration 3D temperature controllable micro-reactor fabricated by femtosecond laser wet etching** [11052-28]
- 11052 0E **Dependence of structure on SBS slow light in double-clad As₂Se₃ chalcogenide photonic crystal fibers** [11052-29]
- 11052 0F **An atomic magnetic gradiometer with 1/ τ uncertainty property based on the self-sustaining method** [11052-30]

- 11052 0G **Freeway variable speed limit system based on traffic meteorological environment monitoring** [11052-31]
- 11052 0H **Angular micro-vibration test of an agile satellite high resolution camera based on liner accelerometer** [11052-33]
- 11052 0I **Spectroscopic system design and analysis of solar-blind wavelength high spectral resolution Rayleigh lidar for atmosphere temperature measurement** [11052-34]
- 11052 0J **Fabrication of close-packed microlens array with superhydrophobicity and high imaging performance** [11052-35]
- 11052 0K **Research on the measurement accuracy of different laser spot center location** [11052-38]
- 11052 0L **Wavelength tuning of type-II "W" quantum well of interband cascade laser** [11052-40]
- 11052 0M **Single-mode distributed Bragg reflector lasers at 2.08 μm** [11052-41]
- 11052 0N **Thermal control design and analysis of a zoom TV optical mechanical system** [11052-42]
- 11052 0O **Evaluation on mirror seeing for AIMS solar telescope** [11052-43]
- 11052 0P **Research on the beam quality of diode lasers based on Wigner distribution function** [11052-44]
- 11052 0Q **Output power improvements of antimonide quantum well laser diodes by rapid thermal annealing on the cavity coating films** [11052-46]
- 11052 0R **Thermal effect analysis for one-dimensional photonic crystal in high power fiber laser** [11052-50]
- 11052 0S **Broadband and low confinement loss photonic crystal fibers supporting 48 orbital angular momentum modes** [11052-52]
- 11052 0T **Room temperature continuous wave operation of GaSb-based semiconductor disk laser near 2 μm** [11052-53]
- 11052 0U **Athermalization for the supporting structure of space camera primary and secondary mirrors** [11052-58]
- 11052 0V **Athermalization optical design of dual-wavelength infrared optical system with double-layer harmonic elements** [11052-60]
- 11052 0W **Design and experimental study of the high uniformity semiconductor linear laser light source** [11052-62]
- 11052 0X **Aliasing reduction for channeled spectropolarimetry based on super-resolution technique** [11052-66]
- 11052 0Y **Optimum design of micro-concave structure of needle valve body based on ANSYS simulation analysis** [11052-67]

- 11052 0Z **Efficient sparse subspace clustering for polarized hyperspectral images** [11052-68]
- 11052 10 **A spatial moving target recognition algorithm based on full information vector** [11052-72]
- 11052 11 **3D microtransformers with air core inside fused silica** [11052-75]
- 11052 12 **1.3 μ m InAs/InGaAs QD laser steady output power over 1.07 W** [11052-77]
- 11052 13 **Nanosecond level passively Q-switched Ti:Sapphire laser using MoS₂ as a saturable absorber** [11052-80]
- 11052 14 **Zonal wave-front estimation from phase derivative measurements on unconnected domain** [11052-86]
- 11052 15 **Thermal vacuum optical performance test system for space laser communication terminal** [11052-90]
- 11052 17 **Image enhancement based on contourlet transform** [11052-93]
- 11052 18 **The design of laser communication terminal test and evaluation station** [11052-95]
- 11052 19 **Experimental realizing image encryption based on optical chaos** [11052-98]
- 11052 1A **Metal surface detection using division-of-focal-plane imaging polarimetry** [11052-99]
- 11052 1B **Study on the influence of aerosol macroscopic characteristics on backscattering signals** [11052-103]
- 11052 1C **Strip-based parallel beam projection model for under-sampling CT system** [11052-104]
- 11052 1D **Design of high-accuracy corner cube retroreflector array** [11052-106]
- 11052 1E **Tuning localized surface resonances in graphene based Au nanosphere dimer antenna** [11052-111]
- 11052 1F **Road meteorological condition sensor based on multi-wavelength light detection** [11052-113]
- 11052 1G **Design and analysis for laser radar system with off-axis parabolic rotating surfaces and a hyperbolic plane-convex lens configuration** [11052-117]
- 11052 1H **The calculation and realization of the visibility between patches of complex 3D scene based on super-computation** [11052-118]
- 11052 1I **Sparse aperture masking technique on measurement of star diameter** [11052-120]
- 11052 1J **Fabrication of a high-fill-factor microlens array using different thermal reflow process** [11052-121]

- 11052 1K **Light field Fourier ptychographic microscopy** [11052-122]
- 11052 1L **Glass preparing and integrating technology in x-ray grazing incidence optics** [11052-123]
- 11052 1M **CGAN for simulation and digital image correction of aero transmission effect and aero heat radiation effect** [11052-127]
- 11052 1N **Generation and development of polarization speckle based on random walks of polarization phasor (Invited Paper)** [11052-1]
- 11052 1O **Non-synchronous processing method base on distributed later warning signal** [11052-131]
- 11052 1P **Development status of optical phased array beam steering technology** [11052-135]
- 11052 1Q **Stability analysis of ion beam figuring removal function based on line scan** [11052-138]
- 11052 1R **Beam nonuniformity compensating by the programmable spatial shaper for the integration test bed** [11052-140]
- 11052 1S **Theoretical and experimental research on Ce:YAG crystals for use in blue laser diode illumination** [11052-126]
- 11052 1T **Defect scattering microscopic imaging based on light source characteristics** [11052-130]
- 11052 1U **Research on pneumatic control technology of medium and large diameter double-sided polishing machine** [11052-133]
- 11052 1V **Calculation and hue mapping of AoP in polarization imaging** [11052-134]
- 11052 1W **Enhanced schlieren imaging applied in heat and air jet visualizations: a wave propagation-based model** [11052-137]
