Volume 10856

Proceedings of SPIE, 1605-7422, V. 10856

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Diseases in the Breast and Reproductive System V*, edited by Melissa C. Skala, Paul J. Campagnola, Darren M. Roblyer, Proceedings of SPIE Vol. 10856 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

OBSTETRICS AND GYNECOLOGY

10856 03	In vitro characterization of collagen organization in the human cervix using polarization-sensitive optical coherence tomography (PS-OCT) [10856-2]
10856 05	In vivo multiphoton imaging of an ovarian cancer mouse model [10856-4]

BREAST CANCER SURGERY TECHNOLOGIES

10856 0F	Non-contact imaging of breast surface for breast surgical planning [10856-14]
10856 0I	Snapshot hyperspectral imaging for detection of breast tumors in resected specimens [10856-17]

POSTER SESSION

10856 0L	A novel multimodal optical imaging device for cervical cancer screening and diagnosis [10856-20]
